LVLS

30TH ANNUAL LONELY VALLEY

KEEPIN' KIND

BULL & FEMALE SALE

2.27.2021

at the farm, Creston, Nebraska

Welcome to our 30th Annual 'Keepin' Kind' Production Sale and celebrating our 40th year in the seedstock business. Which means I would have been 4 years old when my family decided to get into the Limousin breed. Since that time we have added a core group of Angus cows and recently started to implement a few Red Angus females to the herd. Our goal is to be a one stop shop for all your cattle needs, whether it's Limousin, Angus or Red Angus genetics. We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Last year we sold 90% of our bulls to repeat customers. Taking care of you our customer is out #1 priority. As always, we offer an unconditional guarantee on all cattle sold. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

Our Nebraska herd consist of over 450 head of registered Limousin, Lim-Flex and Angus cattle. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits. Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. Forty years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequalled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 27th at the Ranch.

Sincerely,
Lonely Valley Seedstock
Chad Settje

[general sale information]

AIRPORTS: Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield.

DELIVERY: Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles.

ANNOUNCEMENTS: Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes.

SEMEN: Lonely Valley Seedstock reserves the right to semen interest on any bull in the sale.

TERMS: Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction.

MAIL & PHONE BIDS: Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone in the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions.

BLOOD TYPE FOR PARENTAGE VERIFICATION: All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal.

LIABILITY: Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

INSURANCE: Insurance on your purchase can be provided by Mark Smith, Grassroots Genetics & Consulting, Ankeny, IA, 515.229.5227

PAYMENT: Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735. 3% fee on all credit card payments.

ABOUT OUR CATTLE

FEEDING: The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, with- out pushing a lot corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

SEMEN TESTING: All bulls have been semen tested and measured and a certificate will go with each bull sold.

UNCONDITIONAL GUARANTEE: If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZE THE PERFORMANCE DATA

BW :: BIRTH WEIGHT We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW :: WEANING WEIGHT This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW :: YEARLING WEIGHT This is the weight of the cattle taken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG :: AVERAGE DAILY GAIN Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE

We first select without papers, finding all visible phenotypic defects and problems. Once the outliers are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'MAXIMIZERS': Purebred & High Percentage Limousin Bulls These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance with- out sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'STABLIZERS': 75% Limousin x 25% Angus Bulls Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequalled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'OPTIMIZERS': 50% Angus x 50% Limousin Bulls These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four-way cross breeding system. Optimizers are moderately framed, very deep and offer much more thickness than the pure- bred Angus cattle.

'OPTIMIZERS': 25% Limousin x 75% Angus Bulls They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'ANGUS': Purebred Registered Angus Bulls Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our exist- ing lines of seed- stock. Our goal is to provide Purebred Angus bulls that can offer an ideal complement to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

[MAGS CABLE SONS]

MAGS Cable,
sire of Lots 1 & 2.

Scrotal 36

What a remarkable way to lead off this powerful offering! LVLS Optimizer 84H is a double homozygous son of MAGS Cable. He is a 50% Lim-Flex bull that is full of overall dimension and capacity. He's rugged in his build and comes from some of the most consistent and top genetics in the industry. This bull is impressive phenotypically, but numerically he's a true standout. He ranks in the top 10% for his marbling figure of 0.47, in the top 20% for his milk figure of 24 and in the top 25% for his yearling weight figure of 119. MAGS Cable is the MAGS Applesseed son out of MAGS Zequin, a BOHI Top Dollar 7144T female. This bull's dam is a MAGS Unreal daughter, RRDC Adele 84A. Her dam is from a Conneally Admiral 690 female, RRA Eriskay 1115. The lineage is as prolific as can be in this bull's ancestry. His offspring will be true game changers and we believe he will bring a high level of success to your program. You'd have to travel many miles to find a bull with this depth of pedigree, number profile and balanced look all in one package.

This MAGS Cable son will be an integral part of the future success of your program. LVLS Stabilizer 62H is a double homozygous, 75% Lim-Flex bull that will blow your mind- his number profile is as maternally oriented as they come and visually this guy hits it out of the park. His calving ease direct figure of 13 ranks in the top 25% of the breed and his calving ease maternal figure of 8 ranks in the top 20% of the breed. Phenotypically, this guy travels with a long, confident stride, he's capacious through his center third and he's one of the thickest ended bulls in this lineup. His dam is BBJY Karlee 62U, a MAGS Marksman 224R daughter out of a GPFF Blaque Rulon female, KRVN Rafter 434R. Dependability is generations deep in this bull's pedigree. He is capable of achieving any milestone you set for him- so your standard better be high!

Without a doubt one of the strongest herd sire prospects to come out of our program this year. LVLS Harvester 126H is a 75% Lim-Flex bull that boasts an impressive number profile. He ranks in the top 10% of the breed for his ribeye area figure of 1.14 and in the top 15% of the breed for his milk figure of 25. His yearling weight figure of 122 ranks in the top 20% of the breed and his weaning weight figure of 76 ranks in the top 25%. This double black and double polled son of LVLS Bank Account is what everyone's been waiting for! LVLS Bank Account is the MAGS Wazowski son out of an LVLS Top Criteria 8862P daughter, LVLS Wilma 8116W. His dam, HC Dynasty 126 is an HC Coleman Precision 812 daughter. We are confident LVLS Harvester 126H will have a significant influence on any set of females, phenotypically and from a numeric standpoint. He is attractive in his build, loaded with shape down his top and stoutness out through his hip. This one is sure to earn his keep immediately after his first calf crop hits the ground.

Ultra-good performance and superior look backed by some of the best cow families in the industry. LVLS Homestead 3H is a 46% Lim-Flex son of LSTO Best Effort 4833B. LSTO Best Effort 4833B is the consistent EXAR Upshot 0562B son out of the great SBLX Xtra Special female. This bull is out of a Connealy Consensus 7229 daughter, LVLS Bridesmaid 3B. Take a look at his EPD tabulations- they are remarkably balanced and LVLS Homestead 3H is arguably one of the best numbered bulls in this offering. His milk figure of 24 ranks in the top 20% of the breed and his weaning weight figure of 76 ranks in the top 25%. His yearling weight and marbling figures both rank in the top 30%. In person this bull is equally impressive as he is on paper. He's well balanced, big bellied, expressively muscled and dead level in his spine. A near-perfect structure that will set him apart from many. He is homozygous polled and homozygous black.

LSTO Best Effort 4833B, sire of Lots 20 - 26.

If you're in the market for an individual built like a tank - stop right where you are! LVLS Optimizer 609H is a 37% Lim-Flex bull that phenotypically is as solid as any. He is wide based, expressively muscled and powerfully constructed. He is sired by LSTO Best Effort, who is a blend of some of the finest genetics created by Stowers Limousin. Best Effort is a son of EXAR Upshot 0562B and the \$53,000 half interest-valued donor, SBLX Xtra Special. Potentially one of the most complete herd sire prospects to surface from our program.

[LVLS CAESAR 4C SONS]

Another LD Emblazon 999 son that offers a powerful genetic combination. LVLS Emblazon 9134H's dam is LVLS Amber 9134A, a daughter of an MYTTY In Focus son, LVLS Focus 5047Y. MYTTY In Focus has big-time calving ease influence across the board and he's ranked number one for registrations in 2008 through 2010. When you study this bull on the move, you'll understand the longevity and functionality he carries. He's wide based, confident in his stride and flexible off both ends of his skeleton.

 BROWN MS ABIGRACE L7730

Actual BW: 79 lbs. Adj. WW: 516 lbs.

This female is correct on her feet and legs, smooth in her muscle pattern and one that will make a great replacement female to add to your herd. She's still green, but give this one some time and you'll love the result.

Actual BW: 78 lbs. Adj. WW: 597 lbs.

LVLS 7603H is soggy middled, stout in her build and correct in her structure. This is a female to study closely. She'll be a powerful brood cow with structural integrity and a great skeletal makeup.
