Dear Friends and Fellow Cattlemen,

It is hard to believe we are preparing to host our 20th Annual "Proof of Progress" Production Sale. Reaching this milestone gives us an opportunity to look back with gratitude on the many years, cattle and, most importantly, the people who have been a part of the P Bar S Ranch story.

From the beginning, our goal at P Bar S has been simple: produce registered seedstock genetics that can make a positive difference for our customers. Every breeding decision, every mating and every generation has been made with that goal in mind.

As we present this year's Proof of Progress XX offering, we believe it represents some of the finest seedstock genetics we have ever raised aat P Bar S Ranch. This is a deep and diverse offering featuring an outstanding set of Spring Bred Lim-Flex Heifers, Spring Bred Angus Heifers, Spring Bred Red Angus Heifers, along with Angus and Red Angus Beef Bulls.

We have always believed that good cattle must do more than look good on sale day. They need to go home and work for their new owners. Our hope is that every PBRS-bred animal adds value, improves a program and helps create opportunities for the people who invest in our genetics.

While we are proud of the cattle, we remain even more appreciative of the people behind them. We are fortunate to have Elgin Elmore serving as general manager and his wife Jolene, along with Gus and Alex. Their commitment and hard work throughout the year are a major part of what makes P Bar S Ranch possible.

For nearly 30 years, "The Little Ranch with THE Big Genetics" has worked to be a source of quality genetics across multiple breeds. As you study this year's catalog, we hope you can see the years of planning, investment and commitment represented throughout the offering.

Most of all, we thank our past customers, fellow breeders, friends and everyone who has supported P Bar S Ranch over the years. The relationships we have built through the cattle business continue to mean more to us than anything else.

Please do not hesitate to contact Elgin or any member of the ranch or sale team with questions about the offering. We welcome the opportunity to visit with you and help identify the genetics that best fit your program.

Thank you for your interest in P Bar S Ranch and for joining us for Proof of Progress XX. We look forward to another great sale and, more importantly, another opportunity to spend time with friends both old and new.

Sincerely,
P Bar S Ranch
The Little Ranch with THE Big Genetics

Dear Friends and Fellow Cattlemen,

There are certain people and programs in this business that become much more than clients. Over the years, they become friends, and you develop a genuine appreciation for what they stand for and what they are working to accomplish.

For me, Paul Sisemore and P Bar S Ranch are certainly among those.

It has been both a pleasure and an honor for R&R Marketing Company to represent Paul and P Bar S Ranch and to have managed every P Bar S Ranch production sale. As we prepare for the 20th Annual "Proof of Progress" Sale, I find myself thinking about just how quickly those years have passed and how rewarding it has been to watch this program grow and evolve.

Paul has always had a passion for good cattle and good genetics. More importantly, he has been willing to make the investment and stay committed to producing a product that can benefit his customers. The name "Proof Of Progress" has always been fitting because each year this sale is intended to represent another step forward for the P Bar S program.

I can say with confidence that this year's offering represents one of the deepest and most complete sets of seedstock genetics P Bar S Ranch has ever assembled. The offering features an exceptional group of Spring Bred Lim-Flex Heifers, Spring Bred Angus Heifers, Spring Bred Red Angus Heifers, along with Angus and Red Angus Beef Bulls.

Another important part of the P Bar S story is the team behind the cattle. Elgin Elmore and his wife Jolene, along with Gus and Alex, put in the work every day to develop and manage this program. Their dedication to the cattle and to the details is evident throughout this offering.

After nearly four decades in the seedstock business, I have learned that successful programs are built over time. They require vision, patience, investment and a willingness to continually evaluate where the industry and the customer are headed. P Bar S Ranch has continued to do just that while never losing sight of the people who have supported the program along the way.

I encourage you to study this offering closely. Whether your program is focused on Lim-Flex, Angus or Red Angus genetics, there are cattle in this sale worthy of serious consideration and designed to go to work for their new owners.

On behalf of R&R Marketing Company, I want to personally thank Paul for allowing me the opportunity to represent P Bar S Ranch throughout these many years. Managing every sale has been a responsibility I have never taken lightly, and the friendship developed along the way means even more.

We invite you to join us for Proof of Progress XX. As always, feel free to contact me, Elgin or any member of the sale team. We would be glad to visit with you about the offering and assist you in any way possible.

I look forward to seeing you sale day.

Randall O. Ratliff, R & R Marketing Company

When maternal value is the goal, this Donna deserves a serious look. PBRS Donna 5136 is a **Coleman Easy Decision 1539** daughter out of **Coleman Donna 3120,** stacking generations of the highly regarded **Coleman Donna cow family** into one young female. Her numbers tell a distinctly maternal story, ranking in the **top 3% for $M, top 4% $EN, top 10% Teat and Claw, and top 20% HP.** Those are the kind of traits designed around efficiency, fertility, udder quality and the ability to build productive females for the long haul. **Donna 5136 brings the pedigree and maternal foundation to build around—a female whose greatest contribution may be measured by the daughters she leaves behind. That's Proof of Progress.**

The kind of female designed to stay in the herd and do her job. PBRS Donna 5128 comes from the heart of the **Coleman Angus Donna cow family,** sired by **Coleman Below Zero 2106** and out of **Coleman Donna 3190.** Her pedigree combines generations of maternal influence with a numerical profile built around the traits that matter in a working cow herd. She ranks in the **top 4% for both HP and $M, top 5% Claw, top 4% PAP and top 10% $EN, while adding top 10% BW and top 20% CED.** Those numbers point toward fertility, maternal efficiency, structural soundness and calving ease—the ingredients cattlemen continue to demand from.

The name may say Below Zero, but his maternal value is well above average. PBRS Below Zero 5146 is a son of **Coleman Below Zero 2106** out of **Coleman Donna 3151,** stacking generations of proven Angus genetics throughout his pedigree. **Sitz Stellar 726D, Mohnen Substantial 272, Coleman Charlo 0256, Coleman GPS 147, Coleman Navigator 614 and S A V 004 Density 4336** all come together with the influential **Donna cow family** running deep on both sides. His genetic profile is highlighted by **top 4% Claw, top 10% Teat, $EN and $M, and top 15% HP,** pointing toward foot quality, fertility, maternal value and cow efficiency. **Below Zero 5146 is the kind of bull to study when the goal is straightforward—make functional females that can earn their place in the cow herd. Another opportunity for Proof of Progress.**

A world of genetic opportunity wrapped into one intriguing pedigree. PBRS South America 5110 is a son of **Hummel South America** out of **Coleman Donna 9391,** blending Argentine Angus genetics with generations of proven American Angus cow power. His sire side traces through **Don Aparicio Serrucho57 Maxi and Rubeta Fontana 7567,** while the maternal side brings together **S A V Renown 3439, Coleman Donna 714, Coleman Juneau 044** and generations of the influential **Donna cow family.** His numbers add functionality to the pedigree with **top 4% Claw, top 10% Teat and Udder, top 15% Docility and DMI, and top 15% $M. South America 5110 offers breeders something a little different genetically without giving up the maternal and functional traits that matter in the cow herd. A different route toward the same goal—Proof of Progress.**
