FALL PRODUCTION SALE

OCTOBER 26

1:00 PM CT
AT THE FARM

2026

WRIGHT CO,
MISSOURI

A COWHERD DESIGNED TO SERVE

THE COMMERCIAL CATTLEMEN,

Raised and Developed **TO THRIVE IN FESCUE COUNTRY.**

Welcome to our 4th Annual Fall Production Sale!

Our family is truly thankful and appreciative to have the continued support of our customers. We are excited to bring this set of cattle to you and we believe they are ready to add value to your herds.

The sale will take place at our headquarters here in Southern Wright County and we will have online bidding available through DV Auction. Come early to enjoy the fellowship among friends and cattlemen. Sale day has become a favorite time of year for us to visit with so many great people. Lunch will be served starting at 12:00 pm with the auction to follow at 1:00 pm.

These cattle represent our breeding philosophies well and are accompanied by all the performance data to

allow you to make the most informed decision. To that note, Buck Ridge Cattle Co. was again recognized as a Data Driven Herd by the American Angus Association at the bronze level. We hope as you study the sale information you can appreciate our dedication to raising balanced cattle with above average growth and carcass traits built in while keeping maternal function, fertility, and phenotype at the forefront of our culling criteria. At Buck Ridge, our cattle are managed on fescue pasture year-round just like our commercial cattleman neighbors.

BRCC bulls sell with a breeding soundness exam and are a part of a full herd health protocol administered by our veterinarian, Dr. Michael Spragg, DVM of Spragg Veterinary Clinic. We are thankful for his great service, knowledge, and friendship over the last 20 some years.

Buck Ridge Cattle Company is a family owned and operated operation. We know firsthand the time and financial commitment that our customers have invested in their farms, ranches, and cattle. Our passion for raising the best quality genetics and selling them at fair value is as strong as ever and we are excited about the future of the beef industry. This sale would not be possible without the efforts of many and for that we are thankful. Many have contributed and we would like to extend a special appreciation to Chris Earl and our entire marketing team for representing Buck Ridge and fighting for independent cattle producers across the nation.

In closing, thank you for the taking the time to look at our offering. We are extremely honored to continue to work with our repeat customers and would be grateful for the business of first-time customers. Our commitment to you is that we will be working hard every day to improve our cattle and provide the upmost support for our customers in any way we can. Should any issues arise, we are committed to making it right and maintaining a successful long-term relationship.

Please feel free to call, message, or stop by anytime to look at the offering or discuss any questions you might have.

Thank you & God Bless,

Mark Haden, Logan Haden, and Family

Thank you FOR ALL OF
THE SUPPORT!

ANNOUNCEMENTS

- A sale day meal will be provided.
- The cattle are on site and can be viewed any time.
- The cattle will sell on TV screens in our sale facility.
- An up-to-date supplement sheet will be provided sale day.
- All announcements made from the sale block take precedence over printed material in this sale book.

GUARANTEE

All bulls selling are fertile to the best of our knowledge and have passed a breeding soundness exam by a licensed veterinarian. Bulls that sell come with a 1st breeding season guarantee. The 1st breeding season is defined as the 90 days following the first turn out. Should the bull become injured at any point in the 1st breeding season, a satisfactory replacement will be given if available or sale credit in a future Buck Ridge Sale equal to the purchase price less salvage value. Please contact us immediately if an injury occurs so we can quickly make it right.

BULL DELIVERY

Free nationwide delivery to central hub locations across the continental United States. We will make every effort to get the animals delivered in a safe and timely manner.

ONLINE BIDDING

The sale will be broadcast live on DV Auction. Please register to bid at least 24 hours in advance of the sale.

Directions to the Sale Site

From North

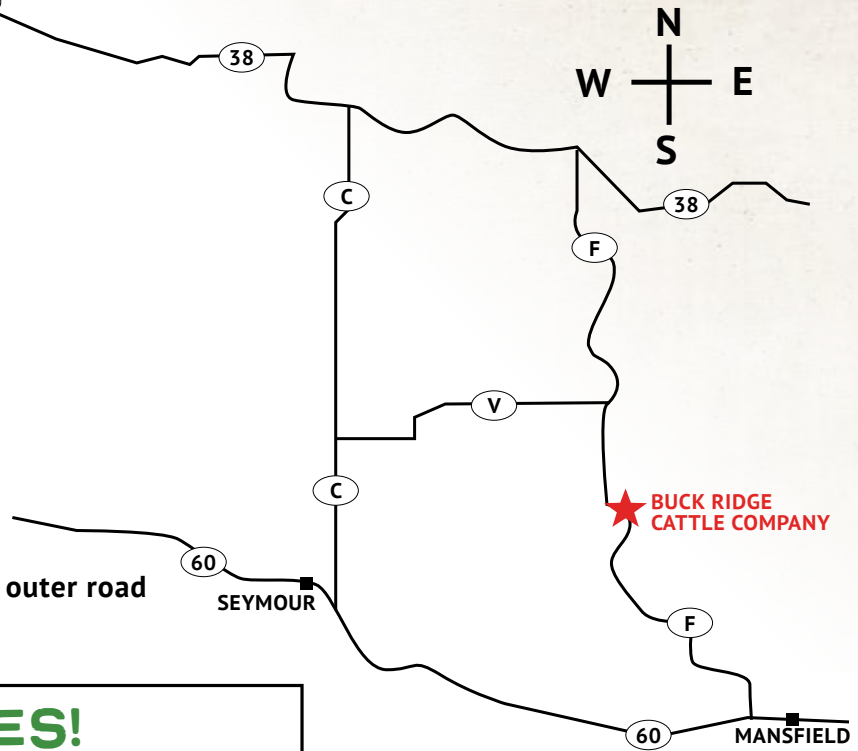

Take I-44 to exit 100 at Marshfield, MO
 East on Highway 38 approximately 17 miles
 South on Highway F approximately 7.7 miles

From Southwest

East on Highway 60 to Seymour, MO
 North on Highway C approximately 2.7 miles
 East on Highway V approximately 5.7 miles
 South on Highway F approximately 2.2 miles

From Southeast

West on Highway 60 to Mansfield, MO
 Exit at South Highway 5 overpass onto north outer road
 North on Highway F approximately 9.8 miles

USING QR CODES!

Each lot has a unique QR Code that will play a video of that specific bull.

1. Open the camera app on your smart device.
2. Hover over the QR Code in the catalog.
3. Tap the link that appears to view a video of that specific lot.

Please note that videos will not be available until two weeks prior to the sale.

Production

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Management

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Carcass

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$ Values

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

BRCC HONOR ROLL 5001

A herd sire prospect that brings balance and maternal strength to a cowherd. Calving ease, above average growth, and double stacked with LD Capitalist 316 makes for an exciting maternal pedigree. He is an age advantaged son of the Pathfinder donor, Musgrave Blkcap McHenry 1800, who is no stranger to making herd sires. Maternal brothers include Musgrave Rarity & BRCC Headwaters 4735.

5001 boasts top 2% \$M, added length of body, and sound structure. Keep the heifers!

BRCC DR FEEL GOOD 5635

The standout bull calf at weaning time and he still hasn't let off the gas. It comes as no surprise that the Miss Beauty cow family is on the bottom side of his pedigree. His 5-year-old mother is the perfect cow to thrive in our environment. 1610 is bold in her rib shape, slick haired, and has excellent fleshing ability at all times of the year. She milks great and brought in this bruiser. 5635 will find your eye sale day!

THANK YOU SPRAGG VETERINARY CLINIC

It is often said amongst cattle producers how important it is to have a good relationship with your veterinarian. We are blessed with the best service from Spragg Veterinary Clinic. The service, sacrifice, and knowledge is second to none. Dr. Michael Spragg and the team are crucial to the success of the BRCC cowherd. To top it off, in over 20 years of vet calls, Dr. Michael has never been known to repeat a chute side story!

SWAROVSKI SONS

Rhoades Swarovski 3007 is a new sire to BRCC this calf crop. These sons have the power and fuel to perform just like their epd's read. 5622 boasts top 2% WW, top 1% YW, top 1% \$B, and top 1% \$C. The bottom side of his pedigree comes from a productive line of cattle at BRCC. His young dam is doing all the right things to excel in our cowherd. Her first 2 natural calves give her a 112 WW ratio, 115 YW ratio, 107 IMF ratio, and 111 REA ratio. His granddam, 0615, is a pathfinder cow that has "it". She breeds early each year and boasts 116 WW ratio, 113 YW ratio, 117 IMF ratio, and 111 REA ratio. His full brother sells as Lot 5.

Proven performance from beginning to end!

**AHIR DATA DRIVEN
HERD BRONZE
LEVEL AWARD
WINNER!**

Launched in August 2025, the program recognizes herds who contribute a set of phenotypes on multiple traits of their choosing each year. Earning this recognition communicates to your customers and the industry your commitment to characterizing your herd through the collection of phenotypic data.

MUSGRAVE CAROLINE 1715 400
PATERNAL GRANDAM OF LOTS 37-43

UNDERSTANDING THE DATA

Maternal and Growth Traits

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Scrotal circumference (SC): Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

Docility (Doc): Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

Milk (MK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. $TM\ Index = MK\ EPD + \frac{1}{2} WW\ EPD$.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Carcass Traits

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Terminal Profit Index (\$TPI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

LIM-FLEX CATTLE CAN DO IT ALL!

LIM-FLEX
Limousin x Angus Hybrid

Excellent Quality Grade with Superior Yield Grade

CUSTOMER *success*

Cramer Farms is a progressive crop and cattle operation in northern Missouri. They have been Buck Ridge bull customers and friends for the past 15 years. Below is harvest data from a set of cattle they fed and sold on the grid.

✓ 58% CAB or Prime

✓ 100% Choice & Above

✓ 65% Yield

Amazing combination of quality and red meat yield with no YG4 or YG5 deductions!

BRCC DR FEEL GOOD 5564N

BRCC Dr Feel Good 5564N leads off the Lim-Flex bull division. His dam, 1682J, continues to make sons that excel and rise to the top. 5564 checks the boxes – performance, phenotype, a strong maternal pedigree. He offers top 1% WW, top 20% Milk, and top 3% \$TPI. Excellent prospect!

45

BRCC LANDMARK 5504N

An exciting herd sire prospect from AHCC Landmark 917L. BRCC Landmark 5504 is a 54% Lim-Flex, homozygous black, homozygous polled prospect that offers calving ease and top 1% growth. In addition to that growth curve, he offers excellent scrotal, milk, and total maternal values. Round it off with great carcass figures and a top 10% \$TPI. A bull that can do it all. We think you will appreciate his physical presence and muscle shape on sale day!

BRCC LADY BARBARA 4822

A direct daughter of the \$300,000 valued donor dam, Musgrave Lady Barbara 212, who is capturing breed attention through per progeny. We are proud to be partners on 212 with Musgrave Angus and Coles Bend Cattle. The 212 progeny continue to be the cream of the crop at BRCC and have had great success in our past sales. We believe the three pictures below tell the story best – generation after generation of maternal, powerful, and productive dams. BRCC Lady Barbara 212 has a bright future that we look forward to incorporating into our cowherd.

Half interest with the option to double.

These beautiful Sharpie females will be some of the first to sell in the country! Early reports from Musgrave Angus after weaning the 1st Sharpie calf crop are excellent – an incredible sire that everyone should use! 6005 & 6010 are a perfect combination of 2 power house cow families coming together – Erica T220 and Blkcap McHenry 1800! We will let you decide which is your favorite – good luck!

20 OPEN COMMERCIAL HEIFERS Selling at the conclusion of the sale!

What an exciting time to be in the cow calf business. This group of heifers are sired by top end BRCC sires and from commercial mothers. 20 solid black heifers. These females were raised at BRCC and meet our quality standards to enter the cow herd. Their mothers know how to work, breed back, and raise a big calf with no special treatment. The heifers will be pelvic measured and tract scored in early October. Sale format will be in groups of 5 head.
