Dear Akaushi Enthusiasts,

It is an honor to be working closely with Mr. Bill Fisher, owner of Legendary Akaushi in the marketing of some of his finest genetics he has ever created. The genetics you find throughout this sale catalog are from the heart of the LAG herd and we are proud to showcase them to the public in this online sales event.

The LAG program was built with only the “older foundation genetics” and has continued to excel in the creation of the very finest that the breed has to offer. This sale offering features the new and fresh genetics packages from the heart of the LAG embryo transplant program, semen from their elite and proven sires and an array of open, bred and cow calf pairs.

If there are any questions in the sale, such as the genetics, transportation, insurance or any other topic we welcome your call.

Sincerely,
Randall O. Ratliff
Wagyu365 Team Member

SALE DETAILS

SALE DATE, TIME & LOCATION ...

Thursday, June 23, 2022
4:00 - 7:00 p.m. CDT

TERMS & CONDITIONS

EMBRYO GUARANTEE ...

Any embryos sold as stated and are not guaranteed on conception.

REGISTRATIONS, TRANSFERS & EMBRYO TRANSFERS ...

As soon as the cattle are paid for, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Akaushi Association. The fee is paid for by the seller.

PAYMENT ...

All lots must be paid for immediately following the conclusion of the Legendary Akaushi Genetics Online Sale, unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ...

Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and Legendary Akaushi Genetics will work together to make this the easiest and most efficient process possible.

LIVESTOCK MORTALITY INSURANCE ...

Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

HEALTH PAPERS ...

All live cattle sold will be accompanied by an appropriate health paper for immediate shipment. Additional health testing may be required from some locations.

GENETIC CONDITIONS ...

Log onto www.Akaushi.com and go to the animal search and results of the genetic testing will be found on the lot selling.

MANAGEMENT ...

Auction money and proceeds will be conducted under Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206
Bond #7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program)

AIKIO

Located at Trans Ova Genetics, Bryan TX

Sired by WSI Umemaru, this Hikari son is born out of the original import cow Kaelemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. This is a rare opportunity to acquire his genetics and they are combined with a top Legendary ET Cow.

This lot's dam is sired by LAG MR HONJO MASAMUNE. Honjo brings well known and proven calving ease, growth, and the carcass traits that he inherited from his sire Red Emperor and dam Kaelemaru.

But who is Honjo? Honjo's story is interesting... When his dam Kaelemaru was 19 and after numerous failed attempts, an Oocyte was successfully collected and fertilized, the resultant birth being Honjo. He became the final calf ever to be produced by Kaelemaru, and he is the half-brother to both Umemaru and Kaelemaru #2. All three have now crossed the rainbow bridge, the boys succumb to injuries and Kaelemaru #2 to old age... However when it comes to genetic preservation, Honjo, will likely be the last man standing. For experimental purposes we bred many of the same cows to Umemaru, Honjo and Kotsukari, Honjo has never disappointed us and we have a good collection of his daughters in our herd.

Beyond the Kaelemaru background, these embryos just keep getting better... the dam of LAG 2152F is a daughter of one of the famous Heartbrand Cows, HB Nikki. She is bred Shigemaru to Nikki (The same as the famous bull Heartbrand Red Star) and she has had a prolific career that keeps getting better and continues to this day. We have confirmed pregnancies to her sired by Umemaru and others developing at this time and we look forward to their birth later in the year.

We've been blessed to work with some truly outstanding cows, and if there were a hall of fame for Akaushi cows Nikki would be in it... she's been bred to Umemaru, Honjo, Rueshaw, Big Al, Tamamaru and others, has produced natural calves and ET calves, her legacy is hard wired into our herd ... you should consider wiring yours too!

Located at Trans Ova Genetics, Bryan TX

These embryos are sired by another elite Kaelemaru grandson, SOR Mr Hiromitsu 1090D (i.e. The Big Unit)! He was the Grand Champion of the Houston Livestock Show in 2017 & 2018, The Grand Champion of the National Western in 2018, and he also won the prestigious PJ Budler Sponsored Word Championship in 2018. He is all bull all the time, and at 2400lbs stands guard over some of the best Akaushi females in our entire herd.

From a conformation basis, he is superior in form to his sire WSI Umemaru who is known as one of the best marbling Akaushi sires ever produced in North America. Mr. Hiromitsu's dam is Kaelemaru #2, a Tamamaru daughter of Kaelemaru. Kaelemaru #2 is a transcendent cow and another hall of famer. Today, in our herd, we have many daughters produced by her, they are sired by Big Al, Kotsukari, Umemaru, Heart Brand Red Emperor, Honjo and we have sold calves sired by HB 518, Shigemaru and Rueshaw to other breeders.

Recently one of her Shigemaru sons sold for \$20,000, and all of her female calves have sold for excess of \$15,000. Kaelemaru #2 is an amazing cow and clearly one of our top. We have a video of her on YouTube, at 15 she still looked like a show cow. Check her out. As for Mr Hiromitsu he is elite, his EPD's for Weaning Weight, Yearling Weight, and Marbling are near the top, he's an established show winner and his absolute presence say it all.

This lot's dam is sired by LAG MR HONJO MASAMUNE. Honjo brings well known and proven calving ease, growth, and the carcass traits that he inherited from his sire Red Emperor and dam Kaelemaru.

But who is Honjo? Honjo's story is interesting... When his dam Kaelemaru was 19 and after numerous failed attempts, an Oocyte was successfully collected and fertilized, the resultant birth being Honjo. He became the final calf ever to be produced by Kaelemaru, and he is the half-brother to both Umemaru and Kaelemaru #2. Sired by WSI Umemaru, this Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. This is a rare opportunity to acquire his genetics and they are combined with a top Legendary ET Cow.

The dam of these is a rare Rueshaw daughter is none other than Heartbrand Nikki! We wanted a lot of Rueshaw sired cows in our herd. But we didn't want any genetics from the Akaushi bull Judo bred into them. We took a top collection of clean double original import cows and flushed them to Rueshaw, we produced 32 calves and retained an ample supply of foundation styled Rueshaw breeding's for the future. We've spent as much time as we could observing these cows and published videos describing their conformation on YouTube. They have nice bags, strong lines, good maternal instincts, good lions, long neck and feminine head pieces... These cows embody Nikki, and we think that translates into a long lived, fully functional, fertile all-around good mothering great cows.

Nikki has been a prolific donor dam having produced 99 registered progenies, time will tell about 2119's final output, but she's one special Nikki Daughter. Accordingly, this is not a speculative breeding, this is something you want in your herd and something you can build on. This is your opportunity to invest in genetics from one of Rueshaw's top daughters, don't miss out on it.

His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. This is a rare opportunity to acquire his genetics and they are combined with a top Legendary ET Cow.

Blast off for marbling, and the conformation is pretty good too!!! Rueshaw to 1815, this is a Legendary only, a Big Al to Fuyuko cow enhanced with Rueshaw making it a combination of Dai 10 Mitsumaru / Dai 3 Mitsumaru and Rueshaw like no other. Many of the Rueshaw 1815 calves made their way to the protein division, and the results were very good. The muscle, the fat, the marbling and clearly a breeding so eye opening that it impacted our breeding program.

3119A and her sister live in a different carcass realm and our initial breeding's with these girls were only to big Al and Hikari, we wanted to insure top carcass production. Reaching out and using Umemaru is about taking a significant physical specimen with know carcass enhancing characteristics and breeding him to a similarly bred female. We have high expectation.

Acquire embryos from one of Rueshaw's most unique daughter's bred to a transcendent sire now. 3119A is backed by Big Al's dam Akiko which contributes further to her balance of carcass traits, growth, and maternal traits! This is a stack original import all in one breeding but organized in a simplified fashion. Rueshaw, Big Al, Fuyuko, Hikari and Kae demaru.. You have a Dai 10 Mitsumaru / Dai 3 Mitsumaru (High Mitsutake) Rueshaw marbler!

BIG AL
FUYUKO

Located at Trans Ova Genetics, Bryan TX

This lot is sired by Heartbrand T0035L, a Tamamaru son out of a Big Al x Himawari! His pedigree is impressive stacking the growth and stature of Tamamaru on top of the proven carcass and maternals of Big Al and Himawari. He is slightly line bred to Dai 10 Mitsumaru 76 being the sire of Big Al and Himawari

So why this T0035L bull, you've probably never heard of him and why breed him to such a prestigious cow. How about it's simply a Legendary thing!! So, in keeping with our Dai 10 Mitsumaru and Dai 3 Mitsumaru combinations and dropping in some Rueshaw, this fits the bill. Additionally, the 950J series of Heartbrand cows Big Al to Himaware were upper echelon performers. T0035L is a generously proportioned bull and he is sired by Tamamaru. The Dam of Tamamaru is Dai 8 Marumani who sired by Dai 3 Mitsumaru, this allows us to mix the Fuyuko in the dam with the Dai 8 Marumani in the sire and we are able to introduce a significant contribution from Dai 3 Mitsumaru.

The T0035L X 3119A breeding is simply using the right bull with the right cows in the right place and not getting caught up in the popular sire syndrome. We expect the prodigy from this mating to be of upper moderate size and be capable of producing some of the top carcasses in the breed. We have confidence in this breeding and think you should too...

The bottom side of this embryo lot is elite carcass traits genetics in HeartBrand 3119A, a Rueshaw daughter! Rueshaw semen is extremely rare and if found regularly sells for \$4,000+ per straw! Acquire embryos from one of his best daughters now. She is backed by a Big Al dam contributing further balance of carcass traits, growth, and maternal traits! This is stacked on the original import Fuyuko. This cow family has produced elite proven sires such as Heartbrand Joe & Terminator.

He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. This is a rare opportunity to acquire his genetics and they are combined with a top Legendary ET Cow.

The dam of the embryos is LAG 2036E, she is a Big Al daughter who brings additional Dai 10 Mitsumaru and Namimaru influence to the table. Her pedigree wraps around to the great bull Mitsutake and through Dai 2 Shigenami to purposefully bring mass and marbling to levels that may not be attainable today. Enter the "Z" cow...The "Z" cow is truly an enigma and we have searched long and hard to determine the genesis of her breeding, alas we have failed. Accordingly, thank you to whomever Aled Akiko to Rueshaw! Z on her own is a one-of-a-kind breeding that screams marbling. We used the Z cow to create the bull Primetime, 2036's sisters, 2158 the 2020 World championship winner and others in our double Akiko breeding experiment. We will continue to reap the benefits of this world class stack of genetics from Big Al x Rueshaw x Akiko for years to come and hope you'll join along. These embryos feature the best-known carcass traits sires and dams in the Akaushi breed, don't miss out on them!

Located at Trans Ova Genetics, Bryan, TX

This lot's dam is sired by LAG MR HONJO MASAMUNE. Honjo brings well known and proven calving ease, growth, and the carcass traits that he inherited from his sire Red Emperor and dam Kaelemaru.

But who is Honjo? Honjo's story is interesting...When his dam Kaelemaru was 19 and after numerous failed attempts, an Oocyte was successfully collected and fertilized, the resultant birth being Honjo. He became the final calf ever to be produced by Kaelemaru, and he is the half-brother to both Umemaru and Kaelemaru #2. All three have now crossed the rainbow bridge, the boys succumb to injuries and Kaelemaru #2 to old age...However when it comes to genetic preservation, Honjo, will likely be the last man standing. For experimental purposes we bred many of the same cows to Umemaru, Honjo and Kotsukari, Honjo has never disappointed us and we have a good collection of his daughters in our herd.

The challenge has always been about using the Akaushi genetics exported from Japan and configured in a fashion that would produce a bull superior to Mitsuhige ET. He was ranked Ranked #1 at the time the Akaushi's were exported and he is a sire or grandsire to many of the top Akaushi bulls used in Japan today. He is the legacy of Mitsutake #2 and ranks above Dai 5 Harutuma #4, Dai 10 Mitsumaru #6, Namimaru #8 and Dai 3 Mitsumaru #12 all of which are all related to our original import.

If you take a deep look at Primetimes background you notice significant emphasis in the use of Mitsutake sons with additions of Namimaru and Rueshaw. By back breeding on this genetic line we have produced a bull that looks similar to Namimaru, carries a very deep red color and is reminiscent of the foundation Akaushi like Rueshaw that predated the 1990's original imports.

LAG Primetime 2040E is a Big Al son of the legendary "Z" cow! This is your rare chance to get into the Z-cow line and Akiko maternal line. He combines the proven performance of breed leader Big Al with Rueshaw's outcross yet high performance carcass and marbling traits. This is an ideal sire to build a branded beef or value-added program around. He brings consistent carcass traits without sacrificing performance on growth or maternal traits. His sire stack of Big Al x Rueshaw x Akiko is a close to original import Akiko as you will come! This super sire will make an enormous impact on any herd and can jump you to the pinnacle of high performance Akaushi producers.

One of the top Rueshaw sons in the breed! His sire stack is an impressive Rueshaw x Shigemaru (Nikki) x Akiko. This is complementary and outcross pedigree to most of the USA Akaushi population (No Big Al, Tamamaru, or Hikari). Rueshaw semen is extremely rare and if found regularly sells for \$4,000+ per straw! Secure genetics from one of his best sons now. LAG RUESHAW'S XXX 2133F ET's dam is none other than Heartbrand Nikki, a direct Shigemaru daughter from Akiko and famous in her own right. She has been a prolific donor dam having produced 99 registered progeny! Don't miss this rare opportunity to get outcross genetics backed by the leading Akiko maternal line!

LOT 9B - Selling 5 units of SOR Mr Hiromitsu 1090D semen.

These embryos are sired by another elite Kaedemaru grandson, SOR Mr Hiromitsu 1090D (i.e. The Big Unit)! He was the Grand Champion of the Houston Livestock show in 2017 & 2018, The Grand Champion of the National Western in 2018, and he also won the prestigious PJ Budler Sponsored Word Championship in 2018. He is all bull all the time, and at 2400lbs stands guard over some of the best Akaushi females in our entire herd.

From a conformation basis, he is superior in form to his sire WSI Umemaru who is known as one of the best marbling Akaushi sires ever produced in North America. Mr. Hiromitsu's dam is Kaedemaru #2, a Tamamaru daughter of Kaedemaru. Kaedemaru #2 is a transcendent cow and another hall of famer. Today, in our herd, we have many daughters produced by her, they are sired by Big Al, Kotsukari, Umemaru, Heart Brand Red Emperor, Honjo and we have sold calves sired by HB 518, Shigemaru and Rueshaw to other breeders.

Recently one of her Shigemaru sons sold for \$20,000, and all of her female calves have sold for excess of \$15,000. Kaedemaru #2 is an amazing cow and clearly one of our top. We have a video of her on YouTube, at 15 she still looked like a show cow. Check her out. As for Mr Hiromitsu he is elite, his EPD's for Weaning Weight, Yearling Weight, and Marbling are near the top, he's an established show winner and his absolute presence say it all.

Exposed 12.21.21 - 3.14.22 to Phoenix 1398F (AF126083) and 2324H (AF170425); estimated due date is December 2022.

Here is a cow sired by HEARTBRAND 5002C ET, contributing genetics of Shigemaru, Heartbrand H0518E, and Big Al. Having H518E and Big Al stacked together on the top side of this pedigree you can breed with confidence in the carcass potential of this cow. Her maternal side is backed by the elite genetics of the Fuyuko maternal line. The Fuyuko maternal line has produced elite sires in the Heartbrand program including Heartbrand Joe & Terminator. Her dam's genetics include Heartbrand Parker (Big Al son), Big Al, and Fuyuko. This creates some slight line breeding in her pedigree to Big Al, an ideal concentration of breed leading genetics!

LOT 18A - Fullblood Akaushi Heifer, born 02.09.2022, BW: 54 lbs.; possible sire LAG Alamo 04E (AF112621)

Here is a daughter of Samsung, he is the well-known and proven Shigemaru son of original import Haruko. Samsung is a legend in the HeartBrand herd because of his incredible longevity. He has endured one of the longest tenures as a herd bull in the HeartBrand herd to date. His impressive feet and leg design, fertility, and quality of offspring has kept him breeding cows twice a year for over 10 years. Samsung daughters are ideal foundation females to build around! He is mated ideally here on a Big Al daughter of Fuyuko. This brings all the complimentary carcass traits you will need on the bottom side. Fuyuko is an elite original import, who family has produced successful bulls such as Joe and Terminator!

Bonus value, the heifer calf is likely sired by Alamo and may be more valuable than mom. This would make three lines of Dai 3 Mitsumaru breed into the heifer, making her of unique value to your breeding program. Dai 3 is the sire of Mitsushige ET who was ranked #1 in Japan at the time Akaushi were exported to the United States.
