Saturday, February 13th

- 8:30 a.m. Coffee and Pastries and cattle available for viewing
- 11:00 a.m. Complimentary steak lunch
- 12:30 p.m. Liberty Ranch Production Sale Begins

LIBERTY RANCH BREEDING GUARANTEE - We guarantee that all bulls sold are fertile to the best of our knowledge and have passed a breeding soundness exam 30 - 45 days prior to the sale. Although all bulls have passed a BES, we know certain problems will arise after you receive your purchase. To help insure your investment, Liberty Ranch will guarantee all bulls selling against breeding injury, and to be sound breeders for the first breeding season. Breeding season is defined as the 90 days period following the first turnout of the bulls. We will provide you with a satisfactory replacement, if available, or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull.

TRUCKING - Free delivery on Central Locations (Bulls Only). Liberty Ranch offers its customers free delivery to anywhere in the lower 48 states. As a part of that delivery we work with reputable livestock transportation companies that we feel comfortable with the handling of your cattle in both a professional and conscientious way. Liberty Ranch will do everything possible to deliver your cattle to a central location that is convenient for both you and the trucking company. Central locations for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We will map out the route after the sale and do our best to get your bulls to you as quickly and conveniently as possible. If you would like to insure your cattle, you can do so on sale day. Most of the cattle will be delivered within 30 days following the sale. If you have questions on delivery then please call the Liberty Ranch office at 785.885.4881.

REBATE - We will also be offering a \$50 PER HEAD REBATE (bulls only) for customers that arrange to pick up their bulls here at the sale location or within one week of the sale.

PAYMENT - Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735.

This year's sale will be February 13, 2016, with our annual Liberty Ranch Customer Appreciation Supper and Social taking place on Friday evening, February 12th, at 7 p.m. at the Knights of Columbus in Plainville, KS. We urge you to come join us for a Limousin steak, refreshment of your liking and most important fellowship amongst new and old friends. Lets celebrate together all that our breed has to offer the industry and people that make a living in the cattle business.

Roger Comeau and Family along with myself, Debbie, Cole and Jonah would like to welcome everyone to our annual Limousin, Lim-Flex and Angus sale. Our entire staff welcome everyone as well.

Thirty-two years ago Liberty Ranch was established as a seedstock producer and propagator of registered Limousin cattle. The main goal was to create a product that would be accepted by serious cattlemen and purebred breeders alike. Since the inception Liberty Ranch has evolved to ranking in the top 10 list of the most cattle registered in the Limousin breed. Liberty Ranch encompasses over 20,000 acres of land and we continue to grow as necessary. We consider everyone that works at Liberty Ranch to be a part of our family and for sure approach every endeavor as a team. We know that putting on a sale of this size it takes a lot of time and dedication and we appreciate everyone involved in making this come to fruition. Our number #1 focus at Liberty Ranch is to make sure we take care of the customers. Without our long list of dedicated customers and new clients coming on at a very steady pace we would not be what we are today. This year we are offering over 200 head of cattle. We will offer for sale the stoutest set of BEEF BULLS ever assembled at Liberty Ranch. They are coming two years that are ready to work and add pounds and performance to your calf crop. They along with young bred heifers and spring bred cows will be the main focus of the sale offering. Also selling will be three groups of five commercial bred heifers.

Since the inception of Liberty Ranch we have been able to work closely with noted cattlemen around the country and have realized their main goals and demands on their programs to make it more profitable. In doing so it has aided us in keeping grounded as to what kind of cattle to produce and what will be in demand. We think we have met this goal with this strong set of sale cattle.

Best Regards,
Michael L. Smith, Manager
Liberty Ranch

RRDC Yander has been an absolute stand out for us since he hit the ground here at the ranch. His actual performance, made him an easy choice for us to keep and use. He posted a 83.4 BW ratio and jumped up to a YW ratio of 109.8. He has done everything we asked of him since day one and is now proving himself as a sire, producing progeny with below average birthweight numbers and above average growth. His half-blood Red Angus dam by Lodestar has been extremely consistent and predictable, the kind of female that makes raising cattle a joy.

We refer to MAGS Unreal around here, as the "options bull" who ties together so many impressive physical traits, especially for a calving ease sire. If you ever have an opportunity to see him in person, you will be blown away by his mass and substance. When you study him on paper, his CED epd puts him in the top 2% of the breed and his DOC score makes him a trait leader in the particular column. In addition to his exceptionally balance statistical alignment and phenotypic power, Unreal is direct son of two proven producers in the Purebred Limousin population. His sons replicate his look, calving ease traits and functionality year in and year out.

We use several MAGS Unreal son's fairly heavy from year to year, RRDC Yogi has really stepped up to the plate and proven himself as one of the great sons that we have the option to use. Like his sire, he is right at the top of the charts for docility and charts a double digit CED epd. Here at Liberty Ranches, there is no room for high maintenance cattle; we like the "no-frills, get the job done" type and Yogi is just that. We couldn't be more pleased with this offering by our homebred herd sire.

Balanced traits straight across the board for growth and maternal, makes it so easy to use this exceptional son of MAGS Unreal on so many of our cows. He offers a tremendous amount a breeding flexibility. He is out of really functional MAGS Ransford daughter, Ransford is the Magness/Stowers owned son of JCL Lodestar out of the Cabin Creek Hailey 9H donor. MAGS Unreal totally stamps his progeny, we expect his sons to do that same thing. If you are looking for proven CED, good disposition cattle this paternal line is the answer.

Zero In is an absolute machine, he has an exceptional amount of mid-body dimension, is royally bred and his growth numbers are nearly off the charts. At Hager Cattle Co., he has a WW ratio of 112 and an actual yearling weight of 1,410 pounds. On paper, he reads with a trait leading 93 WW EPD and 141 YW EPD and still is in the top 10% of the breed for TM. This MAGS Wazowski son is on his way to become a household name for added growth and efficiency. If pounds at 205 or 365 are your priority, you probably need to get Zero In progeny set in your sites.

Leading off our Angus sires in our Lim-Flex program is RRA Mustang 1284. He is a direct son of the Select Sires A.I. stud, SAV Mustang, who excels in the calving ease categories and has a tremendous reputation for producing easy fleshing matriarch type females. He was one of the crowd favorites at the 2010 SAV sale as he impressively calculated a 147 ratio amongst 131 contemporaries for IMF. 1284 has a stacked pedigree for profitability and predictability as he ties together some of the very finest genetics available in the Angus population. Take this opportunity to invest in the promise of proven hybrid vigor in the Lim-Flex sons of RRA Mustang 1284 in this elite offering.

Xerophthalmia is a maternal sister to MAGS Yoko, the past Denver Champion and dam of the popular MAGS Ali. He is a 75% Lim-Flex, homozygous polled son of DHVO Deuce and we absolutely love him statistically from weaning to yearling and for the maternal traits he is passing on. He had a notable start with an actual BW of 60 pounds and adj. WW of 804 pounds. Phenotypically he is extremely powerful in his skeletal construction and sound enough to cover a lot of ground for many years.

The Seymour progeny never seem to disappoint us. MDCS Yancey has proven himself as a consistent sire of low birthweight calves that are structurally sound and work in our environment. His daughters are just now getting ready to calve and we are very pleased with how they have matured and look forward to having them in our production system. These bulls that we are offering out of him are some of our very best.

MDCS YAHOO 100 Y SONS

We have faired very well with our cattle that trace back to the historical GV Limousin herd, MDCS Yahoo goes back on the maternal side of his pedigree to many cattle that were bred and thrived right here in the sandhills of Kansas. He is direct son of MAGS Seymour, our longstanding herd sire. Yahoo and his sons will be perfect in scenarios where proven calving ease is an absolute priority.

Benchmark 015 is multi-generational representation of Coleman genetics that have heavy selection emphasis on growth and performance and produce cattle that will be efficient and particularly profitable when paid on a per pound basis. HC Benchmark is the cattleman's kind and his son's show that as well, to date his progeny have an avg. YW ratio of 105 and individually he has an impressive YW EPD of 122 and his SMTI is in the top 25% of the breed.

MAGS Seymour is homozygous polled and is a direct son of past national champion EXLR New Generation 0721M. He posted a 783 pounds adjust WW and 1,357 pound adjusted yearling weight and scanned a 14.7 for REA and 3.46 for IMF. His dam is out of the prestigious Twin Eagles Angus program that was home to some of the very finest Angus genetics available in the industry.

JCL Lodestar 27L is the double homozygous sire that has made as much of an impact as any in our breed of cattle. He is the calving ease sire and son of Hunts Hi-Liter 245G from a daughter of COLE First Down back to a daughter of Polled Pack Leader. The genetics of JCL Lodestar 27L in our breed has earned him .3 for birth, .79 for weaning weight, .130 for yearling weight, .25 for ST and .14 for marbling. Certainly an industry icon who's influence is felt greatly through this offering.

MAGS Xtra Wet is the epitome of what a great purebred Limousin bull should be like. He is a purebred son of the national champion bull DHVO Deuce 132R and from a daughter of the now deceased legend JCL Lodestar 27L. His first progeny to sell at public auction are highlighted in this sale and they are true highlights. The biggest attribute of MAGS Xtra Wet is his heaviness of bone and extreme foot size and as we know in any breed of cattle that is the far most important trait. If they are good from the ground up then all is good. He has earned a solid set of EPD's with a weaning weight of 84, yearling weight of 105 and docility number of 41 making him a leader in this so very important trait.

LH Xcel Boy 113X is a double homozygous son of LH Rodemaster 338R that has done a tremendous job at Liberty Ranch. He has earned a -0.3 for birth, 99 for yearling weight, 30 for milk and .17 for marbling. He is a 75% Lim-Flex bull that scanned a 15.16 for REA and 3.53 for IMF. His actual performance was 15.16 for REA and 3.53 for IMF. He projects this positive performance into offspring which makes them more in demand.

MAGS Wild Bunch has been a top A.I. sire in our breed and is one of the top sires in the pasture at Liberty Ranch. He is a complete outcross to most established lines of black and polled cattle. His dam is a past national show champion and his numbers are well above breed average. His sons selling in this sale represent his lineage very well and are some of the best in their contemporary groups. Wild Bunch is one of our very top growth bulls, he posts an 89 WW EPD and 129 YW EPD, he also had an adjusted yearling weight of 1,399 pounds.

RRDC 012Z SONS

RRDC 012 Z is a MAGS Wild Bunch son who is the "right kind," we can use him on any group of cows or heifers and not have to worry about sacrificing any of the major traits. He is particularly balanced in the carcass EPD columns. He is a direct son of MAGS Wild Bunch and goes back to one of the most naturally prolific Red Angus cows to ever grace the pastures of Liberty Ranch, MBAB M128.

If you ever have an opportunity to search through past Liberty Ranches catalogs, you will see that many of the top lots are out of maternal half sisters to RRDC 15Y, many you will find are MAGS Regis daughters. His influence has been noteworthy in our program and sires such as 15Y are carrying on his reputation quite nicely. The predictable calving ease genetics represented in this particular bull and his progeny will help many ranchers sleep peacefully at night.

You will just love the opportunities that this son's progeny can bring to the table. RRDC 16Y is a 50% Lim-Flex out of a very top Red Angus cow by the purebred sire, GV Linebacker. He is double digits for CED and above average for marbling and SMTI. At a year, he excelled his contemporaries and had a YW weight ratio of 109.8.

RRDC 59Y is a high percentage Limousin son of MAGS Ransford and is from a daughter of MAGS Sheriff from the once famed Cabin Creek Hailey 9H. This black and polled herd bull sired a set of bulls who are attractive on the profile and more than acceptable in their calving ease and birthweight numbers.

From a 0.5 BW epd to nearly 100 for YW, this 87% percent sire is the type we need more of. We realize that we talk a lot about the influence that JCL Lodestar has had on our program, but we don't think there is enough good that can be said about the sons and daughters he has produced. 25T has followed in his famous sire's footprints and is very solid across the board from birth to yearling and comfortably above average for MB and \$MTI EPD's.

Here is a guide to understanding the whole herd report. Utilize this tool to determine an animals horned/polled and color status, performance and carcass EPDs. Refer to the breed averages under the "Genetics & Performance" tab on the NALF web site to familiarize yourself with the breed EPDs. Evaluating breed averages and percentiles will allow you to narrow down your bull selection. NALF has a useful tool on its website called the "Sire Selector," which allows you to search for sire prospects based on your own selection criteria and benchmarks.

1 TATTOO identification number along with a herd prefix typically located in the upper or center rib of the ear

2 SEX of animal indicated by M for Males, F for Females, S for Steers.

3 PLD - Polled Status of the animal with P denoting a polled animal

4 BLK - Black color status of the animal with B denoting a black animal

5 CED - Calving Ease Direct EPD and accuracy. When sires A and B are bred to similar replacement heifers, you'd expect 5 percent (the difference between +10% and +5%) more of sire A's calves to be born unassisted as compared to sire B's calves. Said another way, due to genes for calving ease passed on from the sires to their calves, each of sire A's calves out of first-calf heifers have a 5 percent greater chance of being born unassisted as compared to sire B's calves.

6 BW - Birth Weight EPD and accuracy. When mated to equal dams, progeny of sire A (listed above) are expected to weigh 4.0 lbs. less at birth than progeny of sire B (-1.0 - 3.0), due to genes for birth weight passed on from the sires.

7 WW - Weaning Weight EPD and accuracy. Weaning weight EPDs are predictors of pre-weaning growth of progeny. Of the two sires represented above, progeny of sire A are expected to weigh 6 lbs. less than progeny of sire B (44-38) at 205 days of age (when bred to dams of equal value), due to genes inherited from pre-weaning growth from the sires.

8 YW - Yearling Weight EPD and accuracy. Yearling weight EPDs are predictors of progeny growth to yearling ages. For example, progeny of sire A are expected to weigh 20 lbs. less (92-72) than progeny of sire B at 365 days of age (when mated to equal dams), due to genes for growth from the sires.

9 MA - Milking Ability EPD, and accuracy. Milk EPDs are predictors of pounds of daughters' progeny weaning weight due to genes for milk the daughters inherit from the parent in question. For example, daughters of sire A are expected to wean calves which are 7 lbs. heavier than calves from daughters of sire B (30 - 23 lbs.), due to genes for milk passed on to daughters.

10 CEM - Calving Ease Maternal EPD and accuracy. When daughters of sires A and B are bred to similar bulls, daughters of sire A have a 4 percent (14% -10%) greater chance

of calving unassisted with their first calf as compared to daughters of sire B, due to differences in genes the daughters inherited from their sires for easy delivery of their first calves.

11 SC - Scrotal Circumference EPD, and accuracy. Scrotal EPDs are expressed in centimeters (cm), with higher values indicating the expectation of genes for larger average yearling scrotal circumferences to be passed on to sons. If mated to equal dams, sire B would be expected to produce sons which average 1.0 cm larger (1.0 - 0) than the average of sons of sire A. Scrotal circumference has also been correlated to the age of puberty in heifers

12 ST - Stayability EPD and accuracy. Stayability EPDs predict genetic differences in the probability that daughters will produce calves at the age of six years or beyond, given that at least one calf was produced prior to the age of six. Generally, higher stayability EPDs represent genetics for greater longevity. Sire B above is expected to have 15% more daughters still in production at the age of six or beyond (+20% vs. +5% = 15% difference) as compared to the percentage of daughters of sire A.

13 DOC - Docility EPD and accuracy. Docility EPDs predict genetic differences in the probability that offspring are scored as 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). The higher docility EPD for sire A above is preferred to that of sire B; specifically indicating that 25% more (+15% for sire A to -10% for sire B = 25% difference) of sire A's offspring are expected to have scores of 1 or 2 as compared to offspring of sire B. Generally, the higher the accuracy value, the more progeny with docility scores in groups which have contributed to the EPD, making the EPD more reliable and less subject to change. Only groups with variation in docility scores are used in EPD evaluation.

14 CW - Carcass Weight EPD and accuracy. Carcass weight EPDs are used to genetically design carcasses with weights that fall within an acceptable industry weight range. Optimum carcass weight EPDs for sires will vary according to the types of cows to which the sires are mated and the calf growing/finishing management regime. If mated to cows of equal value, sire A would be expected to produce progeny with carcasses 10 pounds heavier (20 - 10) at harvest than sire B.

15 REA - Ribeye Area EPD and accuracy. Ribeye area EPDs offer an objective

measurement of genetic differences in muscularity. EPDs for ribeye area are expressed in units of square inches, with larger values indicating larger ribeye area and increased expected overall carcass muscularity. Sire A is expected to produce progeny with ribeye areas that are .30 square inches larger (.50 - .20) on average than progeny of sire B.

16 YG - Yield Grade EPD and accuracy. Just as lower carcass yield grades are favored and indicate greater cutability, lower YG EPDs are favored and indicate genetic differences for yield grade and cutability of offspring. When bred to similar cows, offspring of sire A are expected to average .10 (-.10-0) units of yield grade lower than offspring of sire B.

17 MARB - Marbling Score EPD and accuracy. The marbling score EPD is expressed in units of numeric USDA marbling score, with higher values indicating genes for greater deposition of intramuscular fat, or higher expected marbling score and USDA quality grade at a constant age. When mated to similar sets of cows, sire A would be expected to produce progeny with average marbling scores .20 units lower (-.10 - .10) than sire B.

18 SMTI - Mainstream Terminal Index. The mainstream terminal index takes both genetics and economics into account to rank animals in terms of expected profit per carcass produced from weaning to mainstream market endpoints of yield grade 1s and 2s and Select to low-Choice quality grades. It is based on the assumption that Angus-Hereford cows in a two breed rotation are mated to Limousin-influenced terminal sires and is determined primarily by genetics and economics associated with post-weaning growth and yield and quality grade. In this example, if sire A and sire B were mated to similar sets of black baldy cows, sire A would produce progeny with carcasses worth \$15 (\$55 - \$40) more than those of sire B. The mainstream terminal index does not have an associated accuracy value.

*ACC - Accuracy. Accuracy is a measure of the reliability associated with an EPD. For Limousin cattle, accuracy is designated by either a P (pedigree only), P+ (interim pedigree plus own performance in contemporary group) or a numeric value (performance of individual and subsequent progeny in contemporary group) which ranges from 0 to 1. Accuracy indicates the amount of performance information which was used to calculate the EPD.

Note: Carcass EPDs are only calculated for animals have had carcass data collected on them, their parents, or their progeny by either ultrasound or actual carcass data collection. So in the case of Bull B, for him to have pedigree estimates for his carcass values, his parents would have had data collected on themselves or their progeny.

Rancher Approved

Market Driven

“Using Limousin bulls on my Angus-based cows has all but eliminated calving difficulties, plus those calves are up and nursing right away. This helps maximize the pounds of calves I have to market.”

- Wayne Hepper, Flying O Ranch

Hepper is a progressive rancher who uses Limousin genetics to add performance to his natural, NHTC calf crop. The calves graded 86% Choice with 80% YG 1&2 last year, yielding a premium for himself, the feeder, and the packer.

- Leading off this offering of bred cows is a beautiful homozygous polled daughter of MAGS Unreal. She was one of the standout females when we weaned cattle in the fall of 2013, she crossed the scales at 750lbs.
- This 50% Lim-Flex female is a daughter of one of our favorite cows from Wolf Creek Angus, which is a program here in KS that is focused around efficient cattle that calves easy and are profitable on the CAB grid.
- 23A is in the top 1 of the breed for CED and in the top 5% for MB, she also ranks in the top 10% for BW and SMTI.
- P.E. 6.1.15 to 9.1.15 to RRDC Zarka 3010Z

Cow-Calf Producers - Add Value with Limousin

“Limousin cross cattle give me more pounds to sell while combining quality grade and carcass yield. I highly recommend using Limousin cattle in any program as they add profitability to all segments of production.”

-Fred Wacker, Miles City, Montana rancher and cattle feeder

“Limousin and Lim-Flex bulls have added pounds to my calves at sale time. They have topped the market year after year and sell to the same buyer. They work for him.”

-Galen Peterson, Kansas rancher and cow-calf producer

Limousin are the ideal complement to British-based cattle. Limousin females are biologically efficient and flexible enough to be used under a variety of environmental conditions. Limousin are the leading major Continental breed for calving ease along with moderate milk and mature cow size. The first breed to develop a docility EPD, Limousin cattle have 20 years of documented and improved docility.

THE LIMOUSIN ADVANTAGE

Limousin and Lim-Flex® (Limousin x Angus hybrid) deliver to your bottom line.

- ‡ Calving ease & calf vigor
- ‡ More pounds to sell at weaning
- ‡ Feed efficiency
- ‡ Tested & proven docility
- ‡ Cow & bull longevity
- ‡ Carcass merit

To learn more about the Limousin advantage,
visit www.NALF.org or call 303-220-1693.

Rancher Approved Market Driven

We use Lim-Flex® bulls on our British-based cows because it allows us to achieve our goal of producing a high percentage of cattle that grade choice, have higher yielding carcasses, while maintaining feed efficiency and uniformity.

**-Erik Roen, Sierra Valley Ranch
California**

Roen is a profit-minded cattleman who has been using Lim-Flex bulls on his 2,000 head cowherd for the past six years. Roen markets his calves through Superior Livestock Auction and after topping the market, his calves averaged 94% choice or prime and had greater than a 65% dressing percentage
