

A promotional image for a cattle sale. It features two Limousin cattle standing in a grassy field with a line of trees in the background. The cattle on the left is brown and the one on the right is black. In the top right corner, there is a dark blue shield-shaped graphic containing the date and website. At the bottom, the event name is written in a stylized script font.

Leading off this prestigious online offering is an absolutely beautiful 78% Lim-Flex female from the heart of our program. She is a special daughter of EXLR Wilma 711U out the Heldermon bred donor who highlighted the Tubmill Creek/Greenbrier Cattle Company donor line up, PERF BP LS 554R. 554R prog-

eny are starting to make their mark on programs across the country and will definitely be apparent as sires and dams in many upcoming sales in elite programs. This double polled, double black rock star of a replacement heifer is balanced across the board from CED through YW. In terms of carcass traits she is impres-

sively above breed average for CW, REA and MB as well as \$MTI.

Very few females to be issued a Lim-Flex registration certificate have ever been graced with this many elite Angus cattle. 0302C has been blessed with exceptional lineage from both breeds, including the ultimate female maker, SAV Pioneer, the calving ease deluxe sire, MYTTY In Focus and the matriarch of

the Limousin breed Carrouseles Pina Colada. This exquisitely designed donor prospect brings so much calving ease to table, you will have so many different options come breeding time; she is in the top 5% of the breed for CED, top 10% for BW and top 10% for CEM. She is homozygous black by pedigree as well.

A homozygous polled and homozygous black daughter of the 2013 National Champion Lim-Flex Bull, MAGS Y So Tangled out of a promising young cow here at Logan Hills, TMCK Shining Star 69W. This 71% Lim-Flex heifer is picture perfect in her design and extremely solid in her performance profile. 303C

doesn't have any holes at all in her birth to yearling calculations and is in the top 25% of the breed for MB and top 30% for \$MTI. She is bred to shine bright and lead the way for the next generation of your breeding program.

My goodness, this 68% Lim-Flex donor prospect is knock down good and represents two of the leading breeding programs in the Northeast in Tubmill Creek Farms and Heartfelt Farm. A daughter of successful show bull and breeding sire, TMCK Barley,0309C is certainly a female that is attractive on the profile

and will excel in terms of growth and performance. Currently, she ranks in the top 30% of the breed for WW EPD as well as being in the top 15% for YW. She also posts above average EPD's for CW, REA, MB and \$MTI; thus increasing her value and breeding flexibility.

It was hard to part with this one after we saw her maternal sister do so well this year in the show ring with her calf at side, TMCK LaVeda 006A was Reserve Champion Cow/Calf pair for Julia Weaber at the 2015 Southeast Summer Classic and at the National Junior Show in Tulsa. This cow family is one to tie to,

they are incredibly fertile, heavy milking and easy fleshing. Her maternal genetics compiled with MAGS Y-Axis, the 2013 National Champion Bull, will result in a female that will go straight from the show ring to the donor pen. 0315C is one of the elite females to sell in public auction this year.

81% Limousin and 100% awesome! We love our TMCK Barley calves and 317C is no exception, she is absolutely solid from the ground up. This exclusive female is homozygous polled, has a stacked pedigree and is bred for growth and performance; she ranks in the top 15% of the breed for WW and top 4% for YW.

A granddaughter of the \$30,000 Circle L and Magness donor EXLR La Veda 1002P. 1002P is one of the most productive cows in the breed; she has continuously produced breed-leading genetics, such as this prestigious lot.

MAGS Strawberry Pie is not only the famous dam of TMCK Durham Wheat; she is one of the most perfectly constructed females to ever cross the border to reside at Highland Stock Farms in Alberta, Canada. This is an exclusive opportunity to tap into the phenomenal genetic base that has produced international

champions. 0402C is riveting in the way that she ties together the perfect lines of the Strawberry Pie females and the mass and soft shape of past national champion, MAG Y SO Tangled. Don't miss the 114 YW EPD that 402C records!

As many of you know the TMCK Hydraulic cattle have made a monumental impact on our program and their influence is being recognized from coast to coast within the breed. They are fast growing, massively constructed and absolutely ideal in their design. 305C is the type of bull that you will hear about for years

to come as he has the right confirmation, statistical alignment and proven pedigree to be a big time sire of highly marketable progeny. His growth profile is substantial, he posts a 76 WW EPD and 118 YW EPD as well as ranking above 75% of the breed for \$MTI. This is one of those opportunities that you will

highly regret a year from now if you don't invest in this quality, homozygous polled individual.

This highlight lot is packed with transmissible maternal data, the kind of predictable performance that would be a tremendous asset to anyone looking to raise their own replacement females. This Dream Girls son by the famous, MAGS Y So Tangled records a 65 TM EPD and ranks in the top 3% for CEM. The

Dream Girl cow family originated with the WBR Maternal Girl donor female, who in her prime was one of the leading maternal females in the breed. We feel that this genetic combination is one that will take your program in the direction you desire if you are looking for a sire that can produce both females and bulls alike.

We understand that it is not typical to sell this many weaned bull calves, but we feel that they are that good and their quality is already extremely visible, consequently we confidently offer them to you for your critique. 0319C is one of our favorites and will be absolutely ideal for adding growth and carcass quality to

your program and your commercial bull customers' programs. His pedigree is deep in exceptional individuals who have excelled in their respective herds and have made a name for themselves worldwide. The future is so exciting for this young calf; we can't wait to see him lead your herd bull battery in years to come.

The demand for exceptional Purebred bulls right now is incredible, with that in mind we made the difficult decision to part with the TMCK Barley son. He has been a farm favorite since he hit the ground here. His substance, look and growth have stood out to us and we feel strongly that he is going to continue

to get better and better as time goes on. 0325C stems from the same cow family that produced the A.I. sire and Denver Yard standout, TMCK Alfalfa. We are confident that this 93% black and polled purebred herd sire prospect is exactly what you have been waiting for.

BW: 72 lbs.
