SALE ORDER & SUPPLEMENTAL INFORMATION ...

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at Live-ag.com

AIR TRANSPORTATION ...

Las Vegas, Nevada Airport (LAS)

WATCH & BID ...

Watch & bid online for FREE at bid.Live-ag.com 

We have made preparations to bid and buy livestock through LiveAg's bidding platform. For those unable to attend in person on sale day. Please note that all lots in the sale will be available for viewing online prior to sale day at: <https://bid.live-ag.com/>
If you need assistance with registration or with either bidding platform, call LiveAg at 817.533.6699

TERMS & CONDITIONS ... Cattle will sell under the standard terms and conditions of the respective Associations.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

REGISTRATION, TRANSFERS & EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association, Australian Wagyu Association & American Akaushi Association. The fee is paid for by the seller.

PAYMENT ... All lots must be paid for immediately following the conclusion of the Wagyu and Akaushi "On the Strip" Sale, unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and sellers will work together to make this the easiest and most efficient process possible. Export details are listed on each lot.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

LIABILITY ... All persons attending the sale, do so at their own risk, legal or otherwise for their safety. The consignors, sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur.

PAYMENTS

All lots must be paid for immediately following the conclusion of Wagyu & Akaushi on the Vegas Strip Sale V. You will receive an invoice by email following the sale.

Please read and follow the payment instructions that accompany your invoice copy. Both IN PERSON and ONLINE buyers are welcome to pay by cash, check, credit card (you will be charged a 3% fee on the total sum of your purchase), or wire.

Auction money and proceeds will be conducted under Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206.

Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program). Contact Abby@wagyu365.com for any questions in regards to payment.

For any animals advertised through the American Wagyu Association that are registered with the American Wagyu Association, must include their registration number in sale catalogs, flyers, eblasts, etc. For those animals not registered with the American Wagyu Association please make a statement regarding their eligibility to be registered with the American Wagyu Association and assurance of seller to register them with the American Wagyu Association if the buyer should request such registration.

BID FROM ANYWHERE with

- 1. VISIT LIVE-AG.COM**
Navigate to the “Purebred” tab, located in the main menu. Select the auction of choice.
- 2. LOG IN / CREATE AN ACCOUNT**
Select the “Login or Create an Account” button. Fill out the required fields to bid online. Agree to the terms of service, and finish with the “Register” button.” An account is not necessary to watch an auction.
- 3. REGISTER TO BID**
Once logged in, find your sale of choice and click “Register to Bid”. Agree to the terms and conditions, and click the “Register” button. Your request will be approved in a timely manner.
- * CALL OUR TEAM WITH ANY QUESTIONS**
We’re dedicated to ensuring you have a positive bidding experience. Please call **817-533-6699** with any questions.

Just say “JNR”, and everyone in the business knows exactly which bull you are talking about! He is the modern, game-changing bull that put Wagyu carcass traits in overdrive outside of Japan. His semen and offspring have broken sales records, and rightfully so. With 4000 progeny, 1700 carcasses, and EBV accuracies at 99%, he still records an amazing +3.2 MS and +10.7 EMA! This is a literally a once-a-lifetime opportunity from Booth Creek to invest in genetics that have changed the trajectory of the breed.

Arubial T1701 is the current Gold Standard of Black Wagyu sires in the world! However, his semen is not available at this time and sold in the US for \$15,000 per straw when it was offered for sale. T1701 is the #1 BFI sire in the world and ranks 6th among all bulls (November Breedplan Run 2). He is a son of the proven carcass trait leader, Sunnyside Q540. His dam is the amazing genomic transmitter, Miku Q16, who is unquestionably one of the most dominant females in the breed. Q16 is a Mayura JNR daughter out of a Macquarie Y408 dam. T1701 has already produced breed-leading EBV sons and daughters. This is no surprise, as he sports a great growth curve, plus milk, excellent carcass weight and eye muscle size. His big talking point is his massive MS or +4.6! This is a big-time genomic EBV investment opportunity!

Itozurudoi TF 151 is heralded as the best all-round sire ever of the Wagyu breed by established breeders in the US and Australia. His progeny make tremendous brood cows and carcasses from his progeny excel in mar- bling, rib eye area, and carcass weight. His is a "complete" bull which is why his semen currently commands several thousand dollars per straw. Any opportunity to invest in his genetics should not be missed.

Mayura Notorious N0387, son of Mayura Itoshigenami JNR, is a top Wagyu sire from Mayura Station in Australia, recognized for his marbling and meat quality genetics. His semen has sold for \$62,000 per straw but is currently unavailable. Notorious is a game-changer with his massive EMA EBV and his exceptional fat profile. Because of this, the industry will be chasing Notorious genetics moving forward and this may be the last chance to invest in semen from this highly proven, highly sought-after sire!

This is the last full straw in this collection from Elite Wagyu Genetics inventory.

This bull was purchased directly from Mayura Station and currently resides in Australia. We have high hopes for him as a full blood sire for both seedstock and terminal. We have also used him in our F1 buy back programs as well. If you study his genomics he brings balance between maternal, growth, and carcass traits. He has sired structurally correct calves that are growing nicely and are pleasing to look at, we currently have calves sired by him in our feeding program as well as some heifers kept back as replacements. If you are looking for a uniquely bred outcross to add to your herd, here he is.

 CHR MS TAK 102L

905G is the Power house of the BCW meat company, we have used him extensively in our F1 buy back programs and have a ton of carcass data. He is currently averaging 31.5% DMP on F1's and 37.2 DMP on FB with his highest DMP mark being 59%. Booth creek has also kept several daughters of him back for seedstock production. This bull almost guarantees a home run every time you use him. The carcass pic is of the 59.20% sired by 905G.

Chairman is one of only 5 bulls on Breedplan (August Run 1 2025) with his EBV profile for BW (max), 200D Wt, Milk, CW, EMA, and MS! His balance is spectacular. On top of that, he is recessive-free. He is the #1 BFI recessive free son of Mayura L10! His dam is a Sumo F154 daughter that is a powerful brood cow with proven transmitting ability. One of our best carcass proven cow families! His maternal line is the Chiyotakes from Takeda Farms. He hits the EBV profile big-time for MS and Milk. He is a link sire in the AUWA Progeny Test Program. His 1st calves will be hitting the ground in the second half of 2025! Chairman can be used in almost any situation because of his balance.

Synergy Wagyu has the USA rights to Schottlander R008 currently and we are not selling semen from him commercially. We are utilizing him to create our next generation of elite balanced bred animals. His sire Irongate M352 has made waves in Australia through the renowned Irongate program and is arguably one of the most balanced carcass proven sires in the breed. The dam side of Schottlander R008 is an ultra-unique and rare Westholme cow family, not previously available in the USA, Sekiyoshiko! She brings rare Kedaka/Tottori blood that is outcross but high performance. Here is your chance to source Schottlander R008 genetics.

Dream Maker 5M is a son of Sunnyside Q540. Q540 is making an impact on the breed with his tremendous carcasses. Dam of 5M is a cow that has made a big name for herself in the breed in the last couple of years. The pedigree of 5M is loaded with proven sires Mayura L10 x Haruki 2 x Itozuru Doi x Ito-shigenami. His maternal line is the internationally proven Hikokura 1/10. As a huge bonus, CF504 is an anchor on the maternal side of 5M. 5M will bring both carcass traits and growth in a big way!

Gatekeeper is one of the truly elite sires of the breed with his exceptional genomic EBVs and his equally impressive pedigree. He exhibits elite level carcass traits and is passing this on to his offspring. He has sired progeny over +4.0 MS and over +700 BFI. His figures are backed up with proven sires such as Sumo F154, Mayura Itoshigenami JNR, Yasufuku Jr., and TF151 Itozuru Doi. His maternal line traces directly to the amazing transmitting cows, Benlee Hikohime Z0444 and Benlee Hikohime V2058. Gatekeeper is recessive-free! He is proving himself to be able to make the great ones! Gatekeeper has produced several offspring well over +4.0 MS. He is living up to the lofty expectations of his stunning pedigree. As of the Breedplan February Run 1 2025, he is the only sire in the breed with his EBVs for MS, EMA, and CW. Gatekeeper, Notorious, and Mayura Revolution trace directly to the great Benlee Hikohime V2058. Take note of his sire stack of Sumo F154 x JNR x Yasufuku Jr x TF151 x Kaneyama x Michifuku x Kikuhana x Hikohime 3/2!

T157K leads with top 10% growth traits on 400/600/Mature Wtg and then follows that with top 5 % Carcass traits on Carcass Wtg, and top 10% on Eye Muscle Area (+7.7), top 10% Marble Score (+2.4), and top 10% Marble Fineness (+0.40). Mr Marble K483 is a trait leader for milk growth, CWT, and MS EBVs, from a balanced pedigree featuring a combination of foundation sires — Shigesigetani, Itoshigenami TF148, and Terutani 40/1. On the dam side is the strong Sumo donor female, Sumo Fuku K174 with a genetic pedigree of 55% Tajima and 44% Shimane/Tottori, a notable top 5% Marble Score (+2.4) EBV which has been inherited from a high combination of Tajima sires including Sumo Itoshigenami X81.

RO122H is the sire of the record setting Wyndford female — Wyndford S. YURIKO 412M, Lot 2B from the 2025 Big Texas Sale that sold for \$215,000! A leading L10 sire on the world stage, he is a participant in the '23 / '24 AWA-AUS Progeny Test Program (PTP) as a link sire and has 82 progeny used in 15 leading herds with 50 progeny analyzed. RO122H is the sire on leading female progeny, Wyndford S. Yuriko 412M (WYNF24V012M) with a scorching \$738 BFI. In the recent Nov (Run_1) BREEDPLAN, he leads with top Selection Indexes including BFI, FTI, and FITI. On individual traits, he gives you the double shot of growth and marbling with top 1% -2% on 200/400/600Day Weights, Mature Weights and Carcass weights. He scores top 10% on Marble Score and EMA.

Big Al holds a special place in Akaushi history as the first bull born outside of Japan, arriving in January 1995. Nearly a fullblood brother to the legendary Hikari, he shares the same sire—Dai 10 Mitsumaru—and dam line through Akiko, a Namimaru daughter. A cornerstone of many breeding programs, Big Al has earned his reputation as one of the most influential foundation sires. His legacy is clear in his offspring: powerful performance, consistent calving ease, and strong maternal traits. Big Al is also F11 free, adding to his genetic value and appeal.

Tamamaru is one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai 8 Mar- unami. There's no other foundation sire that can add the length of body and stoutness of structure. His sire, Dai 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.

One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.

Rueshaw II is a hot commodity within the breed because of his special pedigree. He is a son of original import Rueshaw and his maternal grandsire is Judo, the other original import! The pedigree reads Rueshaw x Umemaru x Judo x Dai10. This a classic foundation pedigree which allows Rueshaw II to be used on most females. His maternal line is the proven JVP Kunisakae which is sought after in the industry.

Qualified for International Export to Australia, South America, Central, Mexico, African countries, and others; Not exportable to Europe.

Hacksaw is a son of the elite and highly proven Red Emperor. He is known for his high marbling and carcass traits ability from both sire Big Al and dam Dai 8 Marunami. The dam of Hacksaw is a rare direct Judo daughter. Judo is a largely outcross sire from the 1976 import. The sire stack of Hacksaw is impressive, reading Red Emperor x Judo x Shigemaru x Big Al x Tamamaru x Akiko! This is one of the best maternal lines in the breed having produced numerous elite sires including Big Al, Red Star, etc. Hacksaw is an ideal blend of proven performance and outcross genetics, he is sure to transmit elite carcass ability from the Akiko maternal line.

HB Red Emperor died in 2020 so remaining semen on this great Red sire is in limited supply. A review of AWA EPDs reflect that Red Emperor brings the size with to 10% in yearling weight and carcass weight. For those is the carcass pound game, this is your sire.

Red Emperor is a son of the legendary Big Al who was the first Red Wagyu bull born outside of Japan. His sire, Dai Mitsumaru 76 ranked #1 in the Japanese Red Wagyu Directory with A4 and A5 carcasses. His dam is one of the best Red Wagyu cows in US History, Dai 8 Marunami. She was imported into the USA in 1994 as part of the Kumamoto Prefectural Cattle Improvement Project. Her Sire Dai 3 Mitsumaru 30 was ranked 3rd in the Japanese Red Wagyu Registry with A4 and A5 carcasses. The value of his progeny will make money for programs for years to come. Red Emperor makes amazing calves appreciated by any cattleman.

Be the among the FIRST to get FEMALE SEXED semen on a son of ASHWOOD F X014!

FX14 is the BEST Red Wagyu bull in the ENTIRE Australian Wagyu Association database for adding MARBLING to his offspring. Semen from this direct maternal grandson of the original import dam NAMIKO sells for \$10,000 per straw IF you can find it.

His son, Nikkei (FB111233/EAF111233) gives you access to one of the most valuable bulls in the Akaushi breed today in a FEMALE SEXED package!

Semen sold for \$1,000 in November auction. If you're looking to build high value females with all the marbling you can and an outcross pedigree, be the last bidder!

CLV Shiroi Seigi is a rare Fullblood White Wagyu Bull. Three years ago, Seigi's sire was the only registered white coated fullblood Wagyu bull, and now heat-resistant white Wagyu are increasing. Colombian tests have shown the difference of a black coated bovine compared to a white coated bovine to be 2 degrees internally cooler in the whites. With the rarity of white registered Wagyu, Seigi is the only one available for export semen. Seigi will give one of these rare genes to all his progeny and if bred to black females the calves come out a darker gray and turn a lighter ash blonde in couple months. Help your herd become more heat resistant! Seigi's semen is CSS for export to all countries on the globe and he is the first white Wagyu genetics for export. Seigi is free of all genetic disorders (B3, CHS, CL16, F11, and F13) by parentage only the new IARS has not been tested for.

"Tam," CLV Shiroi Tamamaru, was the patriarch of the White Wagyu. He was a very fast growing bull having bred females at 7 months of age and was fertile at 9 months. By age two he had sired calves born. He was a pet and very docile bull. Tam's grandsire was SOR Unzen who was full brother to IWG Umemaru 69Z the top red marbling bull on the 2017 Sire Summary so some good marbling genetics as well as fantastic growth all in a heat resistant white coat. Homozygous Luminant and will give one luminant gene to his progeny to lighten their coats. For more info on White Wagyu go to www.WhiteWagyu.com. Tam is free of all genetic disorders (B3, CHS, CL16, F11, and F13) by parentage only the new IARS has not been tested for.

UME

This stylish young female stacks some of the rarest foundation Akaushi genetics in the breed. She's sired by Alamo, the flagship Legendary sire and full brother to Red Emperor, combining Big Al with the iconic original import Dai 8 Marunami to deliver calving ease, growth and trait-leading marbling in one package.

On the bottom side, her dam is a Come & Take It daughter out of a Shigemaru × Ume cow — a mating so rare it's essentially only found in the LAG program. Come & Take It brings, Akiko-driven body and cow power, while the Shigemaru—Ume combination is famous for broody, long-lived daughters that rise to the top of any herd. This heifer is built to be a future donor that keeps Alamo, Marunami, Akiko, Shigemaru and Ume all working on your side.

FUYUKO

This heifer brings forward the same thoughtful and proven genetic combination that has been so influential within the Legendary program. Sired by Big Al, she starts with a foundation known for power, fertility, and carcass performance. Her dam follows the Hikari × Rueshaw × Big Al/Fuyuko lineage — a blend that has shown itself to be both highly reliable and remarkably balanced.

One of the advantages of this pedigree is what's not in it. With no Shigemaru, Tamamaru, or Judo present, breeders will find this female especially flexible for future matings. The combination of Big Al on top with Hikari and Rueshaw on the bottom gives her a pedigree that tends to fit well with nearly any of the modern or traditional Akaushi lines. She represents the type of female that can continue to build on the consistency the Legendary program has come to expect from this mating group while offering plenty of room for breeders to customize her direction.

LAG 5161M represents a timeless Akaushi pedigree-built on foundation tires and proven maternal design. Her sire, Hikari, remains one of the most influential Akaushi bulls ever imported, known for transmitting exceptional carcass quality, structural balance, and maternal performance. Hikari daughters have become breed cornerstones, producing cattle that consistently deliver both in the pasture and on the rail.

Her dam, LAG 1085C, is a powerful Big Al x Kaedemaru 2 female—one of the most dependable and eternally driven donor lines in the Legendary program. This mating doubles down on fertility, longevity, and carcass integrity, blending Big Al's rib shape and maternal function with Kaedemaru 2's marine excellence and uniformity. The result is a female that perfectly bridges past and future! LAG 5161M combines the strength of Hikari with the reliability of Big Al and Kaedemaru2 making her a cornerstone prospect for any breeder focused on predictable data driven Akaushi genetics.

This female brings together one of the breed's most relied-upon sires with one of the most respected maternal lines in the Legendary Akaushi program. Her sire, Big Al, continues to anchor the breed with the kind of maternal strength, balance, and carcass dependability that cattlemen have counted on for decades.

Her dam, LAG 2209G, blends Hikari over the powerful Rueshaw x Big Al/Fuyuko cross—a mating that has consistently produced cattle with depth, structure, and the kind of carcass integrity Legendary has built around. The absence of Shigemaru, Tamamaru, or Judo in this pedigree adds an extra layer of flexibility for breeders wanting open mating options without sacrificing foundation quality.

This heifer offers a combination of pedigree confidence and breeding versatility that fits easily into both seed-stock and long-term herd-building programs.

The embryo sire, Goldfinger, is a recently available bull from Australia. He is a Bond son on a Sumo F154 daughter. Goldfinger inherited the very best traits from each of his parents. He got the huge carcass impact of Bond and wonderful growth traits from his dam. He is the best of both worlds. T23 genetics have been in high demand since her IVF session sold for \$10,000 last year and her embryos have consistently brought \$1,000 +! She is bred from now carcass proven Olive Grove Q38 out of a Mayura Station female we were lucky enough to have purchased in the 2nd Mayura Sale. Mayura Q1122 was a unique one-of-a-kind breeding, combining the absolute best carcass proven sire in the world (JNR) and Ginjo K930 a leading high Kedaka and high growth rare Kitahatsuhi 97/1 son. These genetics could not have blended better. Of our T drop females, T23 is the largest in both stature and capacity. She is now transmitting that growth to her progeny in spades with one of her early sons at +111 CW on Breedplan! He currently ranks as the 3rd highest CW bull in Breedplan (Aug1 2025). We see this cow family continuing to expand it's footprint in the Synergy herd for generations to come.

Door Key U087 is the latest elite genomic bull to become available to breeders. He boasts an incredible +4.8 MS, +11.0 EMA, and +715 BFI (Aug run 1). He is the result of generations of progressive breeding by Loch Rogers in his Door Key herd. His sire, Q0102, is putting up super results in the current Australian PTP. U087 is recessive-free bull with genetics that are different from most US pedigrees. This embryo lot is an immense investment opportunity! The donor dam is a full sister to the #14 BFI female, Chardonnay, in the US (Aug run 1) and is a daughter of the superb JNR daughter, Synergy Charity. V08 has a maternal brother at +665 BFI. V08 has an elite combination of carcass trait EBVs that spell profitability.

The embryo sire is Schottlander R008. R008 semen is not commercially available in the US, so here is your opportunity to acquire his genetics from the hottest, most consistent performing maternal line of the Chiyotakes in the country. R008 is the only bull in the world with his combination of low BW and MCW and high Milk, CW, EMA, MS, and MF! He offers a totally different genetic package to other bulls with his maternal line coming from Westholme breeding developed with Westholme bulls. His sire is the elite, proven bull, M352, whose genetics are still rare in the US. The dam side of Schottlander R008 is an ultra-unique and rare Westholme cow family, not previously available in the USA, Sekiyoshiko! She brings rare Kedaka/Tottori blood that is outcross but high performance. Calves from these embryos will put you in rare company that is backed with elite genomic EBVs, exceptional phenotype, and proven carcass performance.

The donor dam, V47233, is an early daughter of Gateway Guardian with excellent carcass EBVs. She is a great representative of the Chiyotakes in the Synergy herd. She has a great sire combination of Guardian x Sumo F154 and has no United or JNR blood. Resulting calves from these embryos will provide outcross genetics compared to much of the US herd.

This embryo lot is an immense investment opportunity! The donor dam is a full sister to the #14 BFI female, Chardonmay, in the US (Aug run 1) and is a daughter of the superb JNR daughter, Synergy Charity. V08 has a maternal brother at +665 BFI. V08 has an elite combination of carcass trait EBVs that spell profitability. The embryo sire is Schottlander R008. R008 semen is not commercially available in the US, so here is your opportunity to acquire his genetics from the hottest, most consistent performing maternal line of the Chiyotakes in the country. R008 is the only bull in the world with his combination of low BW and MCW and high Milk, CW, EMA, MS, and MF! This is a rare opportunity to secure polled Black Wagyu genetics at the very top of the breed. Bar V Poll Red Baron 39 is currently the #2 Homozygous Polled Black Wagyu bull in the United States, and he brings a pedigree that is unmatched in the polled sector. He is a direct son of the famed donor "5U," easily one of the best — and most influential — polled Wagyu females in the world. His calves come small, uniform, and with the added benefit of reliable polled inheritance.

The donor, M6 L10 Okutani PLD 196J, was a highlight of the 2024 M6 sale — a standout young polled female combining structural quality, pedigree depth, and modern breed-leading traits that make her one of the most exciting Black Wagyu polled cows to emerge last year. Her Okutani-based maternal line traces directly to the foundation Japanese Black cow families that deliver marbling, udder quality, and fertility.

Gatekeeper is one of the truly elite sires of the breed with his exceptional genomic EBVs and his equally impressive pedigree. He exhibits elite level carcass traits and is passing this on to his offspring. He has sired progeny over +4.0 MS and over +700 BFI. His figures are backed up with proven sires such as Sumo F154, Mayura Itoshigenami JNR, Yasufuku Jr., and TF151 Itozuru Doi. His maternal line traces directly to the amazing transmitting cows, Benlee Hikohime Z0444 and Benlee Hikohime V2058. Gatekeeper is recessive-free! He is proving himself to be able to make the great ones! Gatekeeper has produced several offspring well over +4.0 MS. He is living up to the lofty expectations of his stunning pedigree. As of the Breedplan February Run 1 2025, he is the only sire in the breed with his EBVs for MS, EMA, and CW. Gatekeeper, Notorious, and Mayura Revolution trace directly to the great Benlee Hikohime V2058. Take note of his sire stack of Sumo F154 x JNR x Yasufuku Jr x TF151 x Kaneyama x Michifuku x Kikuhana x Hikohime 3/2! Chiyotake 532G has established herself as a true matriarch of the herd at Synergy with her superior performance at Synergy, across the US, and internationally. She puts it all together — genomics, phenotype, fertility, and great carcasses. 532 has produced more than 200 conventional embryos already. She has progeny in Ireland, Germany, and Portugal. She is the dam of the breed leading sire, Chairman U16. She has another son by Q540 at +639 BFI and she has a grandson at +665 BFI. Her daughter, Charity, has produced Chardonnay, who is the #14 BFI female in the US (Aug run 1). Since calving earlier this year, 532 has produced 33 grade #1 and 14 grade #2 embryos in two conventional flushes.

T23 genetics have been in high demand since her IVF session sold for \$10,000 last year and her embryos have consistently brought \$1,000 +! She is bred from now carcass proven Olive Grove Q38 out of a Mayura Station female we were lucky enough to have purchased in the 2nd Mayura Sale. Mayura Q1122 was a unique one-of-a-kind breeding, combining the absolute best carcass proven sire in the world (JNR) and Ginjo K930 a leading high Kedaka and high growth rare Kitahatsuhi 97/1 son. These genetics could not have blended better. Of our T drop females, T23 is the largest in both stature and capacity. She is now transmitting that growth to her progeny in spades with one of her early sons at +111 CW on Breedplan! He currently ranks as the 3rd highest CW bull in Breedplan (Aug1 2025). We see this cow family continuing to expand it's footprint in the Synergy herd for generations to come.

G113 semen just sold for \$28,000 for one straw at the Wilders sale. G113 is a highly proven, elite sire in Australia whose semen has not been available in the US. He transmits excellent growth and marbling.

Herd altering genetics right here! Arubial U1945 is currently the #4 BFI bull in the breed, and his embryos are ready to go into recipients now! Not 12 months from now. U1945 is the only bull in the breed with +4.0 MS, +10.5 EMA, and +71 CW! His breed leading BFI comes from his profitability in carcass traits, growth traits, and calving ease! This is an opportunity to gain generations on the competition, that is invaluable in the genetics arena! Champagne is currently the most dominant female in the US when it comes to consistently transmitting elite genomics, beautiful phenotype, and exceptional carcasses. Her performance is living up to her sire pairing of Mayura Itoshigenami JNR x Sumo F154. Champagne's Gatekeeper daughter, Chanel, sold for \$150,000 to La Forteleza in May at the Big Texas Sale. Her other Gatekeeper daughter, Cabernet, has previously ranked as the #1 BFI female in the US for several months. Cabernet has an embryo contract for \$120,000. An IVF flush opportunity from Champagne sold for \$20,000 last year at the Wagyu Vision Sale. Champagne has 15 registered offspring with an incredible 10 over 600 BFI and two at +4.0 MS or higher! The dam of Champagne is 530G, who along with her two full sisters were the results of imported embryos from our Australian donors. They continue to build their legacies of superiority in our genetics and beef programs. These are Takeda Chiyotake maternal genetics at their finest. This is a fantastic investment opportunity to acquire genetics directly out of Champagne, who is fast becoming the cornerstone of her own family dynasty at Synergy and within the breed!

- Incredible world class genetics! The donor dam is a rare Tested RECESSIVE FREE Mayura Itoshigenami JNR daughter! She is a Mayura JNR x Sumo F154 female from the Chiyotake maternal line with tremendous balance of elite growth, carcass weight, eye muscle area, and marble score. This is an elite carcass proven maternal line for us with a maternal brother to T466's dam scoring MS 9+ at only 27 months of age and 445 DOF with our carcass camera.

- Low risk and high performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment! This offering pairs the proven elite marbling sire, Mt. Fuji, with Carolyn, 73W, daughter of Mazda. She is also granddaughter of Kitaguni (FB2422) and Michifuku 4628 (FB7339) on her maternal side.
- Mt. Fuji originated from the Hyogo Prefecture and is heavy breeding from the Tajima line. In 1976, there were two black Wagyu bulls imported from Japan, Mazda and Mt. Fuji. These embryos have both! Mt. Fuji was the beginning of forming the Wagyu herd in the United States as we know it today. Semen on this bull is rare and hard to find. This is an opportunity to incorporate both original bloodlines into your program.

Low risk and high performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment! This offering pairs the proven Itomoritaka FB681's son, Rocky with Windy, 91W, a daughter of SR Y13 Sanji. Windy has been tested resulting in a SCD AA and 5 tenderness. Rocky, son of Itomoritaka J2703 and Sanjirou 767T, tested SCD AA and 7 tenderness. These embryos are a high reliability investment in fantastic genetics.

Ashwood Park Virile is an Australian sire who has very little presence in North America. This is an excellent opportunity to acquire his semen and incorporate into your own breeding program. Virile is a sire with a proven track record, but even better is his highly desirable pedigree of Shigemaru x Hikari x Namiko. The Namiko maternal line has created some exceptional cattle and here is your chance to capitalize on those genetics. The donor dam of these embryos, Natsuki, is a rare daughter of Kotsukari. Natsuki features the legendary Akiko on both sides of her pedigree with Kotsukari, who is a Hikari son of Akiko, as her sire and then Akiko positioned as the foundation of her maternal side. The maternal line features an unrivaled stack of import and original sires in Judo x Shigemaru x Big Al x Tama- maru x Akiko. Resulting calves from these embryos will have great appeal from a performance and pedigree perspective and will create tons of interest for the owner.

Sire and dam are Dual Registered with AAA.

Seller guarantees one pregnancy with the purchase of these embryos

This is a fantastic opportunity to move your breeding program forward as Shindo introduces the next generation of superior genetics from the heralded Akikos. Shindo's sire is the amazing Master Chef, who transmits outstanding phenotype and heavy muscling, along with incorporating rare Kajikari blood. REMEMBER: This mating used female sexed semen so if you need possible donor material this could be a BIG TIME money maker.

This is an embryo from this Brady daughter and Brady is a double Rueshaw out of Akiko! Incredible maternal line sire stack of Red Emperor x Shigemaru x Big Al x Tamamaru. Akiko is the foundation cow on both sides of the pedigree. Her grand dam is the amazing, highly-regarded Gabni Ruby.

This exclusive genetic opportunity promises to propel your breeding program to unprecedented heights. The embryos, meticulously preserved and ready for transfer, are housed in the state-of-the-art facility at Hoofstock Genetics in Ranger, Texas, USA. We understand the urgency of advancing your program, and to that end, we are equipped to ship these valuable embryos to any location within the lower 48 states. Our dedicated team is committed to arrival of these exceptional genetic prospects so you can begin realizing their transformative potential without delay.

CHOICE LOT, FEMALE SEXED EMBRYOS

Shindo introduces the next generation of superior genetics from the Rapid Bay program. Shindo's sire is Master Chef, who transmits outstanding phenotype and heavy muscling, along with incorporating rare Kajikari blood. If you were not able to acquire Master Chef semen, Shindo is a great way to tap into his genetics. The dam of Shindo is the Judo daughter, Judo 73Z. She has established herself as an icon of the breed with her proven ability to transmit elite performance to her numerous progeny. The 73Z cow is built on the powerful foundation of Akiko through sires such as Shigemaru, Big Al, and Tamamaru. Shindo will be a game-changer! The second sire for this choice lot also comes from the Rapid Bay program. Take note of Blue Chip's impressive phenotype and conformation. Adding a stunningly deep pedigree of Ashwood Park Virile x Kotsukari x Judo x Shigemaru x Big Al x Tamarau x Akiko and we have a true super star sire! The Akiko maternal line that Blue Chip descends from is known as the premier carcass traits line in the breed. Akiko herself is the dam of proven sires Big Al, Heart Brand Red Star, TWA Kotsukari, and Come and Take It! This bull is sure to contribute a balance of carcass traits, growth, and conformation to his progeny. Mated with LAG 2102F we add a foundation Samsung daughter boasting fertility, confirmation, and milking ability all in one package. Her bottom side highlights a Big Al daughter of the original import cow Fuyuko. Adding these complimentary marbling traits and structure to these matings should pay dividends many times over moving forward. If you don't know LAG 2102F, get to know her. She is paving her way as one of the few elite performing donor cows of the breed.

The 73Z cow is built on the powerful foundation of Akiko through sires such as Shigemaru, Big Al, and Tamamaru. Shindo will be a game-changer!

Akaichurippu has a performance-packed pedigree that will turn heads. She is a daughter of the currently popular Rueshaw son, GK4 Rueshamaru. Her dam is a daughter of the Australian bull, Ashwood Park Virile. Virile is a maternal son of the great Namiko. The maternal line of Akaichurippu's pedigree continues directly to the breed legend, Akiko. The maternal base is built on a terrific foundation of sires such as Judo, Shigemaru, Big Al, and Tamamaru. This is a performance-proven genetic package!

Sired by WSI Umemaru, this Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. The dam here is a great Rueshaw daughter, JC MS Rueshaw 190. She is a wonderful Homare cow that connects directly to the import Homare through proven, breed leading sires Hikari, Judo, and Namimaru. This pedigree speaks for itself!

As the sire of these embryos, Rueshaw really needs no introduction. With his semen selling over \$20,000 per straw there is huge demand for his genetics. A Japanese National Champion, he was imported to the US in 1976 and provides carcass traits and outcross genetics. The donor dam, Akahime, is a daughter of the popular and proven Big Al son Red Emperor. Akahime stems from the proven performing Homare maternal line. Her sire pathway is highlighted by proven bulls such as Kalanga Red Star, Shigemaru, Hikari, and Judo. This package is the best of generations of breeding.

Kalanga Red Star C402 was purchased from Kalanga a yearling in 2009 and sent to the Stud for semen collection. He grew into a high-performance sire and his progeny are very easy doing! Purchased in 2009 as an impressive yearling, he was well-advanced for weight, type and collected semen for international sales, compared to his siblings! He is a useful sire and is free of all genetic disorders.

Rueshaw really needs no introduction. With his semen selling over \$20,000 per straw there is huge demand for his genetics. A Japanese National Champion, he was imported to the US in 1976 and provides carcass traits and outcross genetics.

This donor, Akasakae, brings low risk and high reward to the genetic package. Her sire stack of proven bulls is incredibly solid with a pathway of Red Emperor x Umemaru x Judo. She is the ONLY Red Emperor X JC30 cow in existence, there are only four JC30 Fullblood Red Females Remaining in the AWA Herdbook. JVP Kunisakae is the foundation cow behind it all. Her dam has over a Million Dollars in lifetime earnings! There are many breeding directions you can go with the genetics in this lot! (Maternal Siblings: JC 280F, JC92, Rueshaw 2, JC75, JC92, JC74)

LAG 2035E ET

BIG AL
HEARTBRAND Z1118P

This elite mating pairs the proven consistency of Samsung with the powerful Big Al-sired donor LAG 2035E ET. Samsung brings the structural quality, fertility, and balance he’s known for, backed by the Shigemaru × Haruko influence that has anchored high-value Akaushi herds for two decades. On the bottom side, 2035E traces to the Z-Cow/Akiko maternal line — one of the most reliable marbling and longevity families in the breed — and she’s been one of the higher-scanning donors in the Legendary program.

These Grade 1 IVF embryos blend foundation-level maternal strength with a sire who stamps his calves with uniformity, correctness, and retained value. A premium opportunity for breeders aiming to move their program forward with genetics that are both dependable and highly marketable.

TAMAMARU

KAEDEMARU

This mating brings together two of the most trusted foundation lines in the Akaushi breed. Umeringo, the Umemaru son from the Ringo line known for injecting outstanding marbling and uniformity, pairs perfectly with 1100, a powerhouse female combining Big Al's all-around performance with the maternal depth and carcass reliability of Kaedemaru 2.

1100 has been a no-miss donor — fertile, easy-doing, and built the way a red cow should be. Stacking Umemaru × Big Al × Kaedemaru 2 gives you carcass predictability with elite maternal security. These embryos are an interesting way to line breed the Kaedemaru maternal line through 1100 and Umemaru while injecting the rare Ringo line into the mix.

The Wright Wagyu Master Chef offers an elite combination of carcass traits from his sire TWA Kijikari (Hikari x Ume), and top 1% of the breed for growth and maternal traits from the Shigemaru and Homare lines.. He is a leading Australian Akaushi sire with very limited semen available.

The dam of this lot is a daughter of GK Rueshamaru. He brings Rueshaw and Keademaru's carcass traits to this donor dam. Behind this is an impressive stack of Ashwood Park Virile x Judo x Shigemaru x Big Al x Tamamaru x Akiko! This donor dam features outcross sires Rueshaw and Judo, but is sure to imprint elite carcass ability from the Akiko maternal line.

If you can't get TWA Kajikari (Hikari x Ume) through his son Master Chef, then we suggest getting him through his grandson, Bald Ridge Henshin! Henshin has a loaded pedigree with breed greats such as Hikari, Ume, Big Al, Namiko and Akiko. He is a deep flanked, well balanced bull that will sire a propensity for elite carcass progeny. We have been very impressed by the Henshin progeny we have seen and we believe he will be a key piece to our breeding program moving forward.

TWA Kotsukari is the only Hikari x Akiko son ever bred and therefore extremely rare genetics given he was born in Australia and few straws were imported to the USA. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny. Acura hails from the Akiko maternal known as having the premier carcass traits line in the breed. Akiko herself is the dam of proven sires Big Al, Heart Brand Red Star, TWA Kotsukari, and Come and Take It!

The dam of this lot was 2024 Wagyu Champion of the world! She is a daughter of GK Rueshamaru bringing Rueshaw and Keademaru's carcass traits to this donor dam. The sire stack behind her is just as impressive being Ashwood Park Virile x Judo x Shigemaru x Big Al x Tamamaru x Akiko! This donor dam is sure to imprint elite carcass ability!

If you can't get TWA Kajikari (Hikari x Ume) through his son Master Chef, then we suggest getting him through his grandson, Bald Ridge Henshin! Henshin has a loaded pedigree with breed greats such as Hikari, Ume, Big Al, Namiko and Akiko. He is a deep flanked, well balanced bull that will sire a propensity for elite carcass progeny. We have been very impressed by the Henshin progeny we have seen and we believe he will be a key piece to our breeding program moving forward.

Red Emperor is a son of Big Al who was the first Red Wagyu bull born outside of Japan. His sire, Dai Mitsumaru 76 ranked #1 in the Japanese Red Wagyu Directory with A4 and A5 carcasses. His dam is one of the best Red Wagyu cows in US History, Dai 8 Marunami. She was imported into the USA in 1994 as part of the Kumamoto Prefectural Cattle Improvement Project. Her Sire Dai 3 Mitsumaru 30 was ranked 3rd in the Japanese Red Wagyu Registry with A4 and A5 carcasses. The value of his progeny will make money for programs for years to come. Red Emperor makes amazing calves appreciated by any cattleman.

Here is a young cow that has become one of our visitor favorites! This is a dream cross - Kotsukari X Ashwood Park Virile. Yumika's dam was a cow that was a foot longer and wider than anything we had seen. Yumika displays extreme muscle, beautiful breed characteristics, and shows incredible width through the rump and over her top. This pedigree is stacked with extreme females - a rare opportunity for an all Australian pedigree!

SOR MR HIROMITSU 1090D IS A DUAL REGISTERED BULL (AAA EAF97439 & AWA FB24704) Hiromitsu is a two time National Champion bull, at the 2018 NWSS and then again at the 2018 HLSR, he is said to be one of the best Akaushi bulls that breeders have ever seen. Hiromitsu creates balance, structural integrity and combines muscle in a spectacular visual package. To add to this he is backed by the impeccable Kaedemaru cow family and sired by the foundation genetics of Usemano. This Multiple Trait Leader ranks in the top 25% or better for five EPD Traits or Index Values.

ABNR 2517K ET (FB89327) is a DIRECT daughter of the original and rare Judo bull. Judo was imported with Rueshaw into America in 1976 for research purposes. He is an outcross to the 1994 importation of reds. Semen collected is limited and in high demand in the states. Judo semen sells for \$4000 per unit when available through distributors. This unique sire stack of Judo x Red Emperor x UKB 803 x Namimaru. She has a maternal line foundation of Homare 128.

This exclusive genetic opportunity promises to propel your breeding program to unprecedented heights. The embryos, meticulously preserved and ready for transfer, are housed in the state-of-the-art facility at Hoofstock Genetics in Ranger, Texas, USA. We understand the urgency of advancing your program, and to that end, we are equipped to ship these valuable embryos to any location within the lower 48 states. Our dedicated team is committed to expediting your shipment, ensuring the timely arrival of these exceptional genetic prospects so you can begin realizing their transformative potential without delay.

One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics. The dam of these embryos, 11XE, is pretty special. She is a great granddaughter of the amazing Kaedemaru! We know the huge impact Kaedemaru has made. 11XE is a daughter of the well-known Rueshaw 92. In her case, Rueshaw 92 was mated to Kaedemaru 2-1, a daughter of Ashwood F X007. Directly behind that mating is the hugely popular Kaedemaru 2! This is truly an exceptional genetic offering invest in.

Big Al is as magnificent a bull as his name sounds. He has been an extremely solid, if not spectacular sire, with as much positive influence on the breed as any other bull. You simply can't go wrong with Big Al. He inherited wonderful all-around performance from his super-dam, Akiko, and his Japanese sire, Dai 10 Mitsumaru. Big Al has been timeless, with his progeny in high demand. This pregnancy combines the exception qualities of Big Al with a daughter of Rueshaw that boasts a magnificent pedigree that includes the breed legend, Buckcherry. This is a rare pedigree of foundation genetics that will be sought by many breeders. The full pedigree of the pregnancy is Big Al Rueshaw x Shigemaru (Buckcherry) x Shigemaru x Kobai! This is a phenomenal opportunity to acquire unique and powerful genetics!

410's sire lineage includes King David who is described by his breeders as "phenotypically appealing, sound-structured and sure-footed," combining muscle, growth, carcass quality and maternal strength in one package. On the performance side, his birth weight was reported at about 70 lbs and his 205-day weight at 578 lbs. His pedigree features breed greats: sire side includes Shigemaru and HeartBrand_Joe, while the dam brings in lineages such as Big_Al and Akiko-family influences. On 410's dam side, are three of the most influential foundation sires in the Akaushi breed and together, these sires established the core genetic base that defines modern Akaushi cattle: maternal strength from Tamamaru, balance from Hikari, and marbling excellence from Shigemaru.

SIRE, ASHWOOD PARK VIRILE

LOT 9 DAM, TEXAS TEN CATTLE 410 ET

LOT 10 DAM, TEXAS TEN CATTLE 412 ET

This bull has a pedigree loaded with import genetics! Ashwood Park Virile, is a proven performer whose semen has brought up to \$3,500 per straw. Virile is the main bull being proven by the Arubial Wagyu ranch in Australia and has proven himself to be exceptional within their program. Semen from Ashwood Park Virile brings the rare and valuable original import cow, Namiko to the front of the pedigree. and notably, Ashwood Park Virile is the half-brother of the highly sought-after bull FX014, one of the most in-demand Akaushi sires in the breed today selling for up to \$15,000 per straw. FX014 compared data on Wagyu Collaborative Genetics showed best in marbling, EMA and carcass weights when compared to the elites Red Emperor and Hikari. Virile brings Namiko to the front of the pedigree, being a Shigemaru x Hikari x Namiko cross. 412's sire lineage includes King David who is described by his breeders as "phenotypically appealing, sound-structured and sure-footed," combining muscle, growth, carcass quality and maternal strength in one package. On the performance side, his birth weight was reported at about 70 lbs and his 205-day weight at 578 lbs. His pedigree features breed greats: sire side includes Shigemaru and HeartBrand_Joe, while the dam brings in lineages such as Big_Al and Akiko-family influences. On 412's dam side, are four of the most influential foundation sires in the Akaushi breed and together, these sires established the core genetic base that defines modern Akaushi cattle: growth from Big Al, maternal strength from Tamamaru, balance from Hikari, and marbling excellence from Shigemaru.

This 100% Akaushi bull is celebrated for his exceptional phenotype, combining muscularity, structure, and marbling in a balanced frame. He is the last living male descendant of the legendary cow Kaedemaru and traces back maternally to Namiaki Ni, one of the original Japanese imports from the 1990s. Known as a calving-ease sire with high carcass index values, Masamune offers both genetic rarity and proven performance. His versatility makes him well-suited for operations seeking to maintain the integrity of full-blood Akaushi genetics while improving carcass uniformity, maternal structure, and marketable phenotype. The dam, Heartland Meadows Wagyu 0301A is a daughter of Myers-Cooper 9009G. Her pedigree traces back to the great foundation cow, Fuyuko, and she is a solid genetic mix of all of the foundation Akaushi bulls.

He is the last living male descendant of the legendary cow Kaedemaru and traces back maternally to Namiaki Ni, one of the original Japanese imports from the 1990s. Known as a calving-ease sire with high carcass index values, Masamune offers both genetic rarity and proven performance. His versatility makes him well-suited for operations seeking to maintain the integrity of full-blood Akaushi genetics while improving carcass uniformity, maternal structure, and marketable phenotype. HeartBrand 1109F represents a concentrated combination of the Akaushi breed's three most proven genetic pillars—Shigemaru (for marbling), Tamamaru (for maternal and calving ease), and Big Al (for growth and yield)—assembled through HeartBrand's selective ET program. Her 13 % coefficient of inbreeding reflects purposeful line-breeding to solidify these elite traits. As a foundation female, 1109F is positioned to produce calves with above-average marbling, balanced structure, moderate birth weights, and strong replacement-heifer potential, ideal for purebred herd expansion programs targeting branded-beef markets.

Known as a calving-ease sire with high carcass index values, Masamune offers both genetic rarity and proven performance. His versatility makes him well-suited for operations seeking to maintain the integrity of full-blood Akaushi genetics while improving carcass uniformity, maternal structure, and marketable phenotype. A young, full-blood Akaushi female with an elite pedigree anchored by Hikari, Shigemaru, Tamamaru, Big Al, and Akiko, representing the strongest carcass and maternal lines HeartBrand ever assembled. Her sire, HeartBrand 3669B, blends the power of Tamamaru and Hikari—delivering consistent calving ease, fertility, and structural correctness—while her dam, HeartBrand 7843W, adds Shigemaru marbling intensity and the proven growth of Big Al. This 2020 cow carries a 13.6 % COI, purpose line-bred for balance, efficiency, and carcass uniformity. Embryos from 3998H combine depth, maternal consistency, and carcass performance rarely available on the open market. Her progeny are expected to deliver the hallmark Akaushi traits—exceptional marbling, feed efficiency, and the kind of structural soundness that builds lasting cow families.

Bred by Christensen Genetics, Shoshone is the only known Shigemaru son out of the \$104,000 donor cow RMW Hoshiko D18, giving him unmatched rarity in today's Akashi population. He weaned at 684 pounds at seven months without corn, showcasing natural growth and feed efficiency rarely seen in purebred Akashi cattle. He is the number one bull for actual IMF % of the entire 2023 Christensen crop, combining high marbling potential with a moderate 5.75 frame and mature weight of around 1,600 lbs. Reports indicate his heifer calves average 78 lbs at birth, demonstrating excellent calving ease without compromising carcass quality.

If you want to be the first with Shosone & HeartBrand 1109F and desire fast-growing, impressive calves that will inherit above-class marbling and make top-notch replacement cows, Shoshone represents one of the most balanced and high-performing Akashi sires available today. HeartBrand 1109F represents a concentrated combination of the Akashi breed's three most proven genetic pillars—Shigemaru (for marbling), Tamamaru (for maternal and calving ease), and Big AI (for growth and yield)—assembled through HeartBrand's selective ET program. Reports indicate his heifer calves average 78 lbs at birth, demonstrating excellent calving ease without compromising carcass quality.

If you want to be the first with Shosone & Texas Ten Cattle 412 ET and desire fast-growing, impressive calves that will inherit above-class marbling and make top-notch replacement cows, Shoshone represents one of the most balanced and high-performing Akashi sires available today. 412's sire lineage includes King David who is described by his breeders as "phenotypically appealing, sound-structured and sure-footed," combining muscle, growth, carcass quality and maternal strength in one package. On the performance side, his birth weight was reported at about 70 lbs and his 205-day weight at 578 lbs. His pedigree features breed greats: sire side includes Shigemaru and HeartBrand_Joe, while the dam brings in lineages such as Big_Al and Akiko-family influences. On 412's dam side, are four of the most influential foundation sires in the Akashi breed and together, these sires established the core genetic base that defines modern Akashi cattle: growth from Big Al, maternal strength from Tamamaru, balance from Hikari, and marbling excellence from Shigemaru.

Bred by Christensen Genetics, Shoshone is the only known Shigemaru son out of the \$104,000 donor cow RMW Hoshiko D18, giving him unmatched rarity in today's Akaushi population. He is the number one bull for actual IMF % of the entire 2023 Christensen crop, combining high marbling potential with a moderate 5.75 frame and mature weight of around 1,600 lbs. Reports indicate his heifer calves average 78 lbs at birth, demonstrating excellent calving ease without compromising carcass quality.

If you want to be the first with Shosone & Texas Ten Cattle 410 ET and desire fast-growing, impressive calves that will inherit above-class marbling and make top-notch replacement cows, Shoshone represents one of the most balanced and high-performing Akaushi sires available today. 410's sire lineage includes King David who is described by his breeders as "phenotypically appealing, sound-structured and sure-footed," combining muscle, growth, carcass quality and maternal strength in one package. On the performance side, his birth weight was reported at about 70 lbs and his 205-day weight at 578 lbs. His pedigree features breed greats: sire side includes Shigemaru and HeartBrand_Joe, while the dam brings in lineages such as Big_AI and Akiko-family influences. On 410's dam side, are three of the most influential foundation sires in the Akaushi breed and together, these sires established the core genetic base that defines modern Akaushi cattle: maternal strength from Tamamaru, balance from Hikari, and marbling excellence from

Mr. Kobe legend is pure Australian Genetics! backed by some of Sumo wagyu top maternal chartaristics! T338 being the sire has given some great marbling score of 3.6 which bring him up to being in the top 30 BFI from T338 sons and daughters. This young bull pushes +600 BFI. This is no surprise with his pedigree of T338 x Sumo F154 x Sumo C058 x Terutani 40/1. This is the maternal line that created Coates Itoshigenami G113!

This is a classic bred, high genomic EBV, young bull. He sports an all-Australian pedigree with his maternal side being anchored by deep Sumo breeding. His sire and grandsire are United and Bond. Both come from the famed Arubial herd and have been proven as breed leaders internationally. Legend's EBV profile shouts great performance with great balance of carcass traits and growth. He can be used in any breeding program.

Marble exhibits superior carcass traits with +11.9 EMA and +2.7 MS. He will be an excellent bull to use in any F1 program. He is built on well-proven sires with a sire stack of United x Bond x F154 x F126 x Itoshigenami x Terutani. His pedigree originated in the fabled Sumo herd and has been proven in Australia and the US. There is great confidence in this pedigree!

Now here's a bull that don't just stand in a pasture — he occupies it, same as a king occupies a throne. TRUX KIKUFUJI 1053M ET is bred from bloodlines so fine they could've been penned by Providence itself. His sire, LAG Rueshaws XXX 2113F ET, is a red fullblood that knows how to lay down fat like a banker lays down silver — steady, rich, and with plenty to spare.

On the dam's side, his grandsire LAG Mr Honjo Masamune brings ribeye to the table big enough to feed a whole town meeting. Between them, they've cooked up a bull that's got muscle in his hide, sense in his head, and history in his veins.

He's the sort of animal that makes you pause your conversation, set down your drink, and tip your hat just a little. A bull built for the man who appreciates the poetry of good breeding — and the profit that comes with it.

If you're looking for flash, he's got it. If you're looking for substance, he's made of it. TRUX KIKUFUJI 1053M ET — a gentleman of the pasture, and a gambler's sure bet on the Strip.

Ari is grandson of the first homozygous POLLED Purebred Wagyu out of Bar R Ranch, Bar R Arimura. His dam if a big wide daughter of Arimura and extremely docile. His Sire is the patriarch of white Wagyu, CLV Shiroi Tamamaru. Ari has been a fast growth bull and has bred my purebreds for the last two years and some fullbloods. He has given me the first polled white heifer and maybe next year a polled white bull.

Ari is free of all genetic disorders (B3, CHS, CL16, F11, and F13) by parentage only the new IARS has not been tested for. If you want to begin both luminant heat resistant Wagyu as well as polled genetics in your herd he would be the way to go.
