TRANSPORTATION

Commercial Airports within the Region

Raleigh - Durham International Airport (RDU)

Wilmington International Airport (ILM)

Duplin County Airport (DPL) ***private airport**

LIABILITY

All persons attending this sale and its related functions do so at their own risk:

Wilders Wagyu and W365, their employees and all sale representatives assume no liability, legal or otherwise, for any accidents or injuries that may occur.

SUPPLEMENT INFO

The information printed in this catalog may contain errors - any corrections, including updates will be presented on or before the start of the sale.

Wilders Wagyu and W365, are not responsible for any errors and will work to make sure all data is accurate. Anything mentioned off of the auction block overrides preprinted information.

MANAGEMENT

Auction money and proceeds will be conducted under Bond # 7901027402, U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program. (Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206)

HEALTH AND VACCINES

All animals have been vaccinated and wormed according to Wilders Wagyu vaccination protocols provided by Livestock Veterinary Services. Bulls have passed a Breeding Soundness Exam. Open heifers have been tract scored and passed a Breeding Soundness Exam. Cattle selling bred have been confirmed pregnant using ultrasound by our herd vet, and cattle selling open are guaranteed to be open. **All donors sell open and have never been flushed.** All animals will be accompanied with a health certificate for interstate shipment.

DELIVERY & PICKUP

Must be coordinated with Wilders Wagyu within a reasonable time frame after the sale. Wilders Wagyu will provide free hauling to Protocol Farms in Texas, along with free hauling to select areas based on location. Buyers are encouraged to contact Jake Newbold to find out if their delivery location qualifies for free hauling. For locations outside of the free hauling area, the Wilders Wagyu team can help coordinate delivery at a market rate.

LIVESTREAM

Watch Live & Bid Online with LiveAg.

Can't make it? Join us online by visiting bid.live-ag.com - Cattle will sell in catalog order.

- Register for an account as a new bidder by clicking "Create an account"
- Fill out the required fields to bid online. Agree to the terms of service, and finish with the "Register" button."
- Once logged in, find your sale of choice and click "Register to Bid". Agree to the terms and conditions, and click the "Register" button. Your request will be approved in a timely manner.
- Call the LiveAg Team with Any Questions! We're dedicated to ensuring you have a positive bidding experience. **Please call 817-533-6699 with any questions.**

TERMS & CONDITIONS

Animals sell with a 100% guarantee of parentage:

Registrations are through the Australian Wagyu Association while most are dual registered with the American Wagyu Association. Animals have been tested for the following genetic conditions: F11, B3, CHS, CL16, IARS.

All sales are final, and payment must be received before shipment can be made:

Absentee/Internet buyer payments can be wired to the sale management's custodial account before cattle are released to the buyer. Present buyers must provide payment at the time of checkout unless arrangements have been made with the sale management.

All lots become the buyer's risk once purchased on the day of the sale:

After purchase, all costs are the buyer's responsibility. All costs for exporting lots are the buyer's responsibility unless arrangements (management, calving, etc.) have been made with Wilders Wagyu.

PLEASE CONTACT JAKE NEWBOLD AT

Dear Wagyu Enthusiasts,

On behalf of the Wagyu365 team, it is our pleasure to welcome you to the StayWILD'26 Sale, November 7, 2026, and another outstanding offering from Wilders Wagyu.

Reid and Jaclyn Smith, along with the entire WILD team, have built Wilders Wagyu with a clear vision—to develop Registered Black Wagyu genetics that combine beef quality, performance, predictability and real-world value. In a relatively short period of time, their commitment has resulted in one of the breed's larger and more progressive registered Wagyu herds.

What makes the Wilders program especially unique is the connection between the genetics they produce and the beef ultimately delivered to the consumer. Their breeding program has been developed with an emphasis on improving carcass quality, performance and profitability for both seedstock and commercial cattlemen. The performance and carcass information collected within the program continues to provide valuable insight into the genetics represented throughout this offering.

As you study the catalog, you will find cattle and genetics backed by current pedigrees, strong EBVs and the phenotype necessary to complement the numbers. The WILD team has placed considerable emphasis on utilizing proven, high-accuracy sires while continuing to make mating decisions with the next generation firmly in mind.

Just as important is the WILD branded beef program. Wilders Wagyu has created a direct connection from genetics to the finished beef product, with WILD beef being enjoyed in restaurants and by consumers throughout the marketplace. The carcass and beef photographs featured throughout this catalog provide a glimpse into the end product behind many of the genetics being offered. That connection—from the breeding pasture to the plate—is an important part of the Wilders story.

Great cattle and great beef, however, are only part of a successful program. People, relationships and customer service matter. Reid, Jaclyn and the WILD team have remained committed to those principles as they continue to grow their operation and create opportunities within the Wagyu industry.

We also want to recognize Danielle and Jake for the professionalism, attention to detail and tremendous amount of work they have put into preparing this sale. Their efforts, along with those of the entire Wilders team, are greatly appreciated.

Wagyu365 is proud to once again work alongside Wilders Wagyu in branding, marketing and presenting this special event. We sincerely appreciate the confidence placed in our team, and most importantly, we thank each of you for your interest and continued support of the Wilders Wagyu program.

We encourage you to study the offering, evaluate the genetics and reach out to any member of the Wilders Wagyu or Wagyu365 teams with questions. We look forward to visiting with you and welcoming you to the StayWILD'26 Sale on November 7, 2026.

Best regards,

Randall O. Ratliff

It is hard to believe another StayWILD sale weekend is already here. After another year of working with these cattle, watching our program continue to develop, and preparing this offering, we are excited to open the gates and have everyone back on the farm for our StayWILD'26 Production Sale.

Over the past year, **we have continued to grow and challenge ourselves as both a seedstock producer and a beef company.** From the genetics we develop to the cattle we feed and the carcass data we collect, each part of our program gives us another opportunity to learn, improve, and make more informed decisions about the direction of our herd.

This year's offering represents some of the very best of what we have built at Wilders Wagyu, and we are proud to put these genetics forward. Throughout the catalog, you will find cattle and genetics from the heart of our program, backed by cow families and pedigrees we have invested heavily in, along with some of the most exciting genetics we have developed to date. **We believe strongly in this offering and the opportunities these cattle can provide to fellow producers.** Our goal remains to raise Fullblood Wagyu cattle that can make an impact across every stage of production while continuing to gather the data that helps us better understand the genetics behind them.

But our StayWILD Production Sales have always been about more than sale day. It is an opportunity to bring people together, catch up with old friends, meet new ones, talk cattle, and continue building the relationships that make this industry so rewarding. **Cultivating Culture, Crafting Wagyu continues to represent exactly that: investing in our cattle, our people, and the Wagyu community around us.**

Thank you for making the trip to our farm and for the continued support of Wilders Wagyu. **We are incredibly proud of the StayWILD'26 offering and excited to share some of the best our program has to offer with you. We look forward to another great weekend together.**

StayWILD,

- Reid & Jaclyn Smith

WE'RE THE **WILD** ONES

At Wilders, **the people behind our program and the culture we build matter just as much as the cattle we raise.** That mindset is reflected in the **core values behind our WILD name.**

These values shape how we work, how we care for our cattle, and how we continue moving Wilders forward. Great people. Exceptional cattle. **The WILD way.**

WILL TO WIN: We are self-starters with unwavering drive who compete to achieve success.

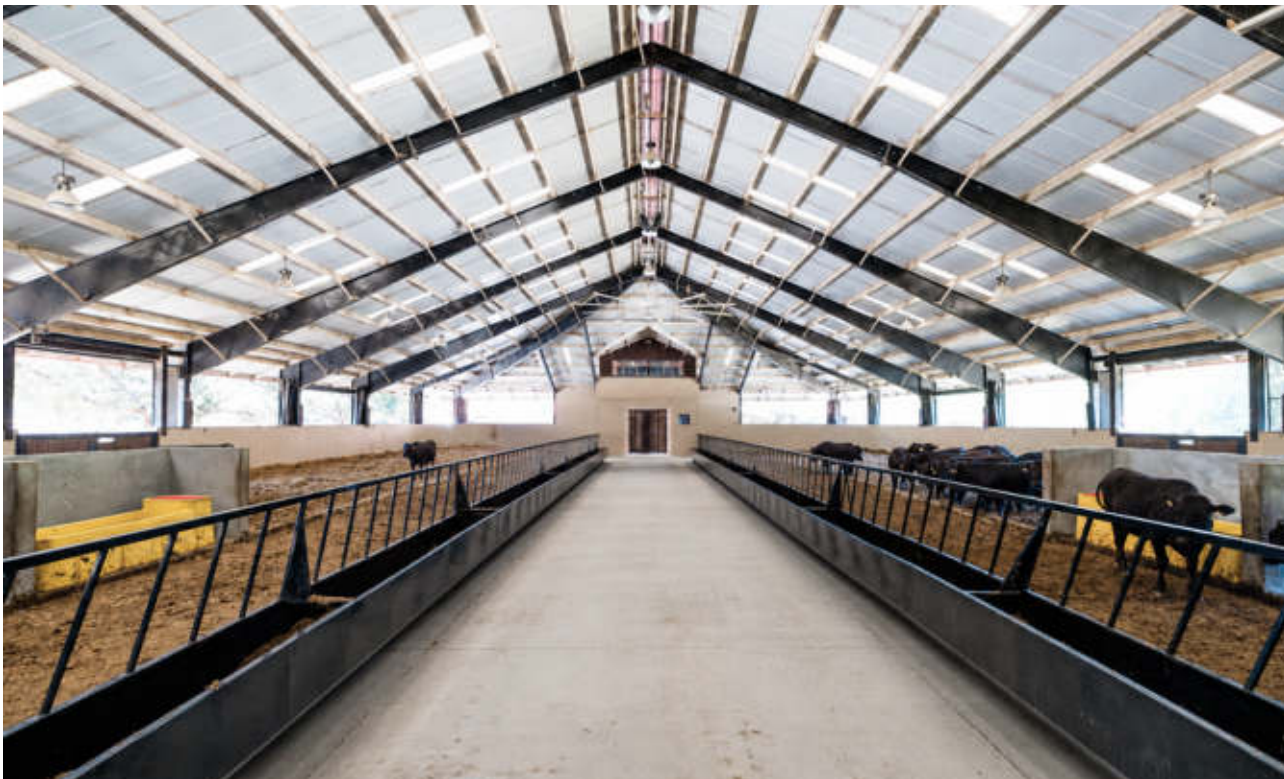

INTENTIONAL ADAPTABILITY: We consciously embrace change through mutual flexibility, strategic innovation, and purpose-driven versatility to advance our people, products, and services.

LIVE COMPASSIONATELY: We take a humble and responsible approach to how we serve each other and serve our community.

DISCIPLINED EXECUTION: We expect operational excellence through safety, accountability, and an efficient and fast-paced environment.

“As the manager of Genesis Enterprises, we set out to invest in a Wagyu program that was fully integrated. We met Reid and Jaclyn Smith of Wilders Wagyu and their team and could have not been more pleased with their professionalism and now friendship. We invested heavily into their '25 sale and after hosting our Inaugural Wagyu Sale this September, we have experienced the results we needed to make our investments work. We will continue to support a program that believes in building a program first and taking care of their customers. #togetherwearebetter”
GENESIS ENTERPRISES, OK - JASON SHEPARD

WILDERS ON-SITE FEED FACILITY

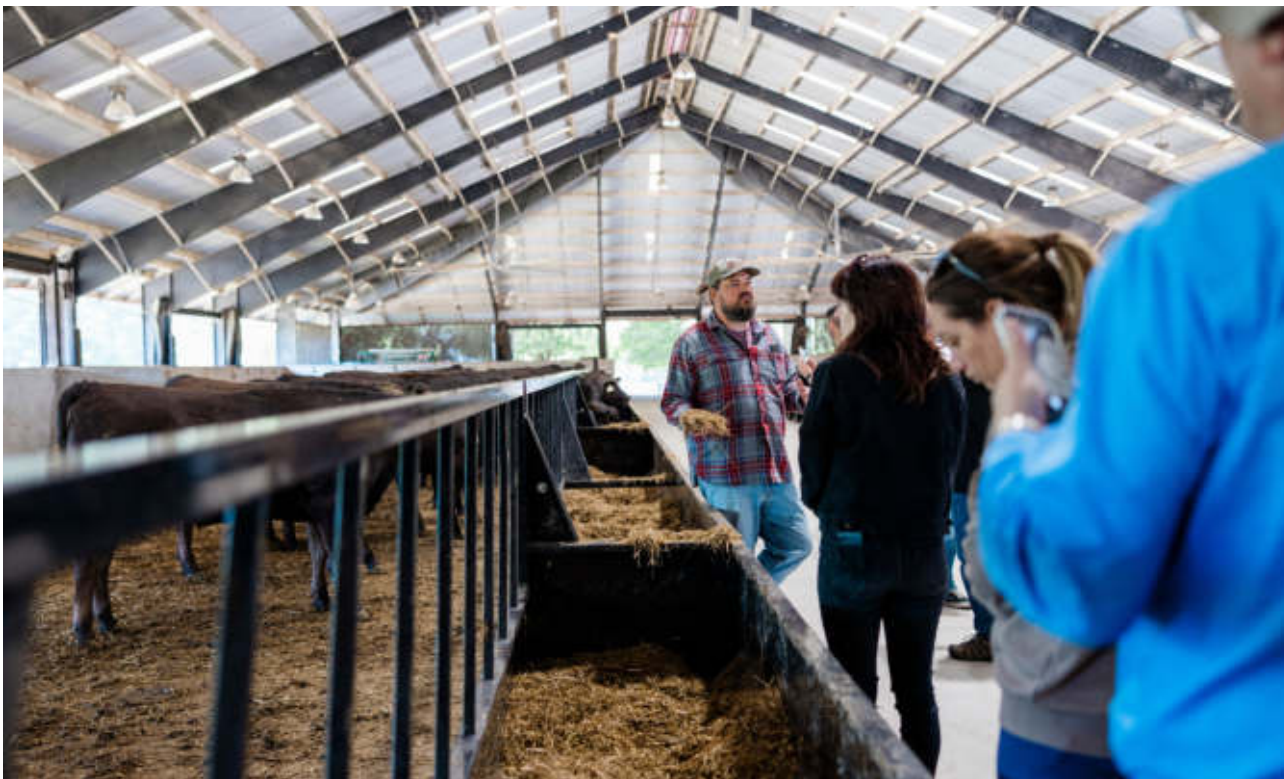

Bringing our feed program on site gives Wilders greater oversight of one of the most important stages in evaluating our cattle: how they perform from weaning through harvest.

Our goal goes beyond simply feeding cattle. **We are building a system that allows us to follow our genetics throughout the entire production cycle, tracking performance, management, nutrition, and ultimately carcass results within our own program.** When that information is connected back to pedigree and genetic profiles, we gain a more complete picture of what our cattle are capable of producing.

From how cattle develop in the pasture and perform on feed to what they ultimately produce on the rail, **each stage adds another piece to the story.** Over time, this allows us to evaluate sire groups, cow families, and individual genetic combinations using information gathered throughout an animal's life rather than relying on a single measurement or data point.

Our on-site feed facility is an important part of that strategy. The more we can learn from our own cattle, the more informed we can be in our breeding decisions and in the genetics we offer. For our customers, that means **genetics supported by a deeper understanding of how they perform throughout the production cycle, adding meaningful information and value to the genetics they bring into their own programs.**

From pedigree to pasture. From the feed bunk to the rail. **We are building the data to understand the entire animal and using what we learn to make the genetics we offer our customers even more valuable data to understand the entire animal.**

“Wilders Wagyu has always been a positive experience for me. From attending their farm tour to participating as a buyer in their on-farm auction, I have consistently been impressed by their commitment to customer service. Customer satisfaction is clearly a top priority for the entire operation.”

LA ROCA RANGE, TX - STEVE FRISINA

DATA-DRIVEN DECISIONS

For us, data is more than a record of what happened. **It is a tool for making better decisions about what comes next.**

As both a seedstock producer and a beef company, we have the opportunity to follow our genetics beyond the pasture and evaluate how they perform through feeding and harvest. Through the WILD Carcass Database, **we collect and study results from our own cattle to better understand the genetics behind the beef we produce.**

That information comes back into our breeding program, helping us evaluate sires, cow families, progeny, and genetic combinations with actual performance in mind. Combined with our new on-site feed program, it gives us **greater visibility from the feed bunk through harvest and continues to strengthen the connection between our seedstock and beef programs.**

Every carcass adds another piece to the picture. As our dataset continues to grow, so does our ability to make more informed breeding decisions and identify genetics that are working within our program. **For producers investing in Wilders genetics, that data brings added confidence to their investment. Our goal is to offer genetics backed by information from every stage of production, giving our customers more than a pedigree to invest in and greater confidence in the genetics they take home.**

"Wilders have always treated us like family. Jake at Wilders tries to understand your needs so he can guide you in the best direction for your ranch. Highly recommend!"

THE DOUBLE D CATTLE FARM,
IN - VICKI & ALAN DENO

A BEEF COMPANY FIRST

At Wilders, we consider ourselves a beef company first. **As both a seedstock producer and beef company, we have the opportunity to follow our genetics beyond pedigrees and performance numbers. We raise and feed our own cattle, collect carcass data through the WILD Carcass Database, and ultimately see those genetics represented in the beef we sell directly to customers, chefs, restaurants, and retailers.**

That connection gives our team a more complete picture of how our cattle perform from pasture to plate. The information we gather along the way comes back into our breeding program, helping us make more informed decisions about the genetics we retain, develop, and offer to other producers.

For us, being a beef company first means never losing sight of what we are ultimately working toward: raising better cattle to produce better beef.

OUR PARTNERS

Great beef is only part of the story. **The people who prepare it, serve it, and share it with others are an important part of what we do at Wilders.**

We are fortunate to work alongside chefs, restaurants, retailers, and culinary partners who value knowing where their food comes from and care about the quality of what they put on the plate. From our 100% Fullblood Wagyu beef to our Berkshire pork, these partnerships allow what we raise here in North Carolina to reach tables and communities well beyond our farm.

For us, **these relationships are also an opportunity to listen and learn.** Working directly with the people preparing our products gives us valuable perspective on the beef we produce and keeps us connected to the experience of the people ultimately enjoying it.

We are grateful for every partner who chooses to put Wilders on their menu, behind their counter, or at the center of the table. Take a look at some of the talented people and businesses helping us share what we raise.

OneCompassion is a faith based nonprofit dedicated to glorifying God by impacting and developing people to build up our local community. Through the Build Ministry, OneTable Community Meals, Holiday Ministry, and other outreach efforts, OneCompassion serves individuals and families throughout Johnston County and surrounding communities with practical support, connection, and compassion. 100% of the proceeds from this donation lot will go directly to OneCompassion and its work within our local community. In 2025, Santos Patronos Ranch and Corey Alsobrook joined together to purchase the OneCompassion Donation Lot for \$8,000. We are grateful for their generosity and invite the Wagyu community to help us continue that impact at StayWILD'26. Once again this year, Reid and Jaclyn Smith will personally match the contribution from the donation lot, double its impact within our local community.

WAGYU BREEDING VALUES 2026.09.09																		

“Black Jack Ranch is proud to highly recommend Wilders Wagyu. Our relationship with their team has extended across many areas of the Wagyu business - from purchasing quality seedstock and live animals to genetics, breeding opportunities, and continued industry support. What stands out most about Wilders Wagyu is that they understand this business is about much more than simply buying and selling cattle. They value relationships, stand behind their program, and are committed to helping their customers succeed long after a transaction is complete. We have been extremely pleased with the quality of the cattle and genetics we have acquired through Wilders, as well as the professionalism, knowledge, communication, and integrity of their team. Whether we are discussing a live animal, evaluating genetics, or looking toward the future of our breeding program, they have always been willing to work with us and provide support. In the seedstock business, trust and relationships matter. We appreciate doing business with people who are as committed to advancing the Wagyu breed as we are. Wilders Wagyu has proven to be a valuable and trusted partner to Black Jack Ranch, we look forward to continuing to grow our for many years to come.”

KIM HOWARD, BLACK JACK RANCH, MS

“We decided to buy land and start working with cattle. We didn’t know anything except we wanted Wagyu. We call Wilders about their upcoming sale. Just to try and get some info never really expecting anyone to call back. Within the hour, Jake Newbold called us back and talked with us over an hour about how we should get started, suggestions to buying, how to buy through the auction online. He treated us like we had been cattlemen our entire lives. He never mad us feel uneducated. He called us during the auction; he delivered our cattle to us. Looked around our farm and gave us suggestions. He calls us frequently to check in and we can call him anytime with questions. Wilders is an exceptional company to work with. They don’t just sell you a cow and disappear. They are there every step of the way. Jake has become a friend to us. Oh yeah, the cattle is top quality! The herd is healthy, gentle and never any issues. We love our cows as much as we love Wilders. We can’t wait for the next sale.”

“Doing business with Wilders has always been knowing we are being treated honestly and fairly. More like friends than customers.”

MORNING STAR CATTLE, KS
- DAWN & CHAD HAUSER

“As I reflect over the years that we have known Reid and Jaclyn, Jake, Dani and all the others from Wilders Wagyu, one word keeps coming to mind and that is integrity. There is simply nothing better than knowing the people that have been blessed to do this life with are solid, faith and family before fame and fortune kind of people. We look forward to the years ahead working together and watching our programs grow.”

SANTOS PATRONOS RANCH, TX
- JEFFERY M. COATNEY

“Our experience at Wilders Wagyu was truly incredible from start to finish. Their hospitality, knowledge, and passion for Wagyu made it an unforgettable experience that we are extremely grateful to have been a part of.”

COASTAL CATTLE COMPANY, SC
- CHAD STREYFFELER

CULTIVATING CULTURE, CRAFTING WAGYU
