ATTENTION!

Why is AA-10 so special??

In the Wagyu Breed the preferred fat type is AA. Of all the Wagyu in the USA only 18% test out as AA fat type. Of those that test out as the AA fat type less than 1% will test out with a tenderness score of 10. If you now take away any of those that test out AA-10 that are free of known genetic disorders you are looking at a very very small group, less than a couple dozen. Wagyu 100 in this auction is bringing you the opportunity to obtain genetics from an elite group of AA-10 influenced matings. Take your herd to the next level.

Lot 1

Heifer | - | 07.15.17

This is a chance to own the first SCD AA-10 heifer calf produced by Wagyu 100's AA-10 Bull MFC Michiyoshi 522C. MFC Michiyoshi 522C is the only AA-10 bull produced by the late Michiyoshi who is the number one ranked marbling bull free of recessive genes in the 2014 National Wagyu Sire Summary. This calf will remain at Wagyu 100 until five months of age at no charge. Heifer has been parent verified, SCD tested with a result of AA-10.

Free of all known genetic disorders.

TERMS of FLUSH

The buyer is bidding per embryos produced during the flush. The buyer is obligated to take (6) embryos which are paid upon the close of this auction. The buyer will be given the option to purchase any embryos produced beyond the (6) required at the same price per embryo. Should (6) embryos not be produced during the flush the seller will prorate back the difference of produced verses paid for. Seller pays for all flushing cost including the semen and either freezing of embryos or direct transfer. The flush will be performed at Champion Genetics in Canton, Texas during the first week of November. Flush dates will be given to the Buyer so if they would like to set up recips for direct transfer they can make arrangements with Champion Genetics. If direct transfer is not arranged all embryos will be frozen. All cows that will be flushed are available for production of export eligible embryo's. There will be an additional cost of \$50 per embryo for export eligible embryos.

KOJI (FB3135)

Kujimi is simply put one bad ass looking wagyu. When people visit she is the one they pick out. She has great size. We are excited to see the results when paired with MFC Michiyoshi 522C., it will be size on size.

Free of all known genetic disorders.

MFC Michiyoshi 522C

MFC MICHİYOSHI 522C is the only DNA verified SCD AA-10 son of the late Michiyoshi. Michiyoshi the sire of MFC Michiyoshi 522C was the #1 ranked bull free from genetic disorders in the 2014 US sire summary. MFC Michiyoshi 522C is well on his way to exceeding his sire bringing not only a higher SCD score of AA-10 but also a drastic increase in size. If you are looking to bring AA genetics into your herd without sacrificing size, MFC Michiyoshi 522C is the hands down best option out there. MFC Michiyoshi 522C semen is EU Qualified for export. SEXED SEMEN will be available this Ffall.

This bull is an example of what we produce here at Wagyu 100. We like to focus on the foundation bulls. The dam of this bull is a Daughter of Itozuru Doi 151 the most sought after genetics with semen selling in excess of \$9,000 per straw. The sire is Shigefuku 005. Shigefuku 005 is from the Kedeka line and weighed a reported 2,400 pounds. Shifefuku never made it into the US, only his semen. Availability of semen for Shigefuku getting very hard to find and sells for over \$2,500 per straw.

Free of all known genetic disorders.
