ATTENTION!

Why is AA-10 so special??

In the Wagyu Breed the preferred fat type is AA. Of all the Wagyu in the USA only 18% test out as AA fat type. Of those that test out as the AA fat type less than 1% will test out with a tenderness score of 10. If you now take away any of those that test out AA-10 that are free of known genetic disorders you are looking at a very very small group, less than a couple dozen. Wagyu 100 in this auction is bringing you the opportunity to obtain genetics from an elite group of AA-10 influenced matings. Take your herd to the next level.

Lot 1 HEIFER

Heifer | Ear Tag 132 | 04.13.17

To be registered upon completion of sale.

MONJIRO 11550 (FB201)

BAR R TAKASURU 1 K (FB4954)

BAR R 15P (FB5905)

BAR R MISS 50J (FB4217)

Wagyu100 is bringing back the foundation genetics with this mating. Bejiro is a bull that has virtually no semen available and what is available sells for over \$2,500 a straw. This heifer is the daughter of Okutani one of the original females imported with Suzutani, Bejiro is sired by Haruki 2 who is starting to become one of the top trait leaders in the breed. He is a full brother to Genjiro and full brother to Fujiko the first wagyu born in the United States. The dam in this breeding Fukukane is Wagyu 100's top donor. Shed has great size and an SCD score of VA-9. In her pedigree you find the foundation sire of World k's Michifuku, TF Kikuhana and World K's Takazakura. Fukukane averages 21 embryos per flush. Fukukane brings great size to the breeding.

Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was snatched away by US investors in the early 90's and exported to America. Upon arriving in

America a Japanese investor purchased Kenhanafuji for a reported \$150,000 and took him back to Japan. With a limited supply of semen available offspring of Kenhanafuji has been very limited. The dam of this bull is Nanashi. She is a daughter of the great Itozuru Doi 151. Itozuru Doi 151 semen is limited to only a handful of straws are left in existence. The last recorded sale of Itozuru Doi 151 semen sold for more than \$9,000 a straw. Itozuru Doi 151 beat Michifuku in every statistical category of comparison in fullblood Wagyu carcasses. By the time his progeny were tested and his value discovered Itozuru Doi 151 was deceased leaving a very limited supply of semen. The cows produced by Itozuru Doi 151 typically reach weights in excess of 1,500 pounds. Nanashi's Sire is the great Sanjirou SCD AA-7. Wagyu 100 is one of the first to offer this mating.

This heifer is foundation bull over foundation bull. The sire in this mating Shigefuku J1822 is a bull bred from within the main Kedaka lines. He exhibits higher growth rates, body volume and desirable coat type. Shigefuku 005 weighted in at 1,735 lbs. at 23 months of age. There are no

known reports of his full mature weight since he never left Japan but realistic estimates are 2,400 lbs. Shigefuku 005 was a bull that never left Japan only a limited supply of his semen was ever exported into the USA therefore the supply of his semen is almost nonexistent selling for over \$2,500 per straw. The Dam in this mating is a Michifuku daughter. Michifuku has proven to be the benchmark for all Wagyu sires in respect to carcass production. This Japanese import has proven himself as the Wagyu industry's top ranked carcass. What makes this dam special is the AA genetics in the pedigree not just Michifuku with an SCD score of AA-5 but we also find JVP Fukutsuru 068 and Kikuyasu-400. JVP Fukutsuru 068 is the number one ranked marbling carcass in the US sire summary and has an SCD score of AA-7. Kikuyasu-400 was the largest Tajima bull imported into the USA and has an SCD score of AA-5. If you are looking for a great future doner don't miss this package.

This is a chance to own a son of World K's Kage. On October 23

at the Muddy Flats cattle dispersion sale Lot 1 a daughter of World K's Kage sold for \$47,500. World K's Kage is a bull known for great growth potential. World K's Kage is a very long bull with great structure. It is that extended length that we are looking for in our use of World K's Kage in our program. The dam of this bull 19 green is one of our larger cows here at Wagyu 100. She is the Daughter of Bar R Ichiro 31R who is a son of JVP Fukutsuru 068. Fukutsuru 068 is the number one ranked marbling bull in the US sire summary with an SCD Score of AA-7. The dam is an F-11 carrier. At the time of this catalog this bull had not yet been tested for F-11. Wagyu 100 will guarantee E7 free of f-11 or refund the full amount of the bid. Wagyu 100 will retain the right to have this bull collected at our cost for use in our breeding program only.

DAI NI SAKURA 7 (FB612)

MIZUKURA 17W (FB12171)

KENHANAFUJI (FB2461)

KOBE MIZUTANI 607E (FB3214)

HEATHERKURA (FB2205)

The sire in this mating Shigefuku J1822 is a bull bred from within the main Kedaka lines. He exhibits higher growth rates, body volume and desirable coat type. Shigefuku 005 weighted in at 1,735 lbs. at 23 months of age. There are no known reports of his full mature weight since he never left Japan but realistic estimates are 2,400 lbs.

Shigefuku 005 was a bull that never left Japan only a limited supply of his semen was ever exported into the USA therefore the supply of his semen is almost nonexistent selling for over \$2,500 per straw. The dam in this mating is Mizukura 17W. She is the daughter of World K's Takazakura who is sired by Takei the son of the legendary Japanese sire Yasafuku J930. What makes Mizukura special to us is the bottom side of Mizukura's pedigree is Kobe Mizutani who is the daughter of the very sought after Kenhanafuji. Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was purchased by U.S. Investors in the early 90's and exported to America. Upon arriving in America a Japanese investor purchased Kenhanafuji for a reported \$150,000 and took him back to Japan. Semen on Kenhanafuji is very hard to locate.

Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was snatched away by US investors in the early 90's and exported to America.

Upon arriving in America a Japanese investor purchased Kenhanafuji for a reported \$150,000 and took him back to Japan. With a limited supply of semen available offspring of Kenhanafuji has been very limited. The dam of this bull is CHR MS Itozuru Doi 367. She is a daughter of the great Itozuru Doi 151. Itozuru Doi 151 semen is limited to only a handful of straws are left in existence. The last recorded sale of Itozuru Doi 151 semen sold for more than \$9,000 a straw. Itozuru Doi 151 beat Michifuku in every statistical category of comparison in fullblood Wagyu carcasses. By the time his progeny were tested and his value discovered Itozuru Doi 151 was deceased leaving a very limited supply of semen. The cows produced by Itozuru Doi 151 typically reach weights in excess of 1,500 pounds. The dam of CHR MS Itozuru Doi 367 is a daughter of World K's Sanjiro SCD AA-7. Wagyu 100 is excited to offer this limited breeding.

SARASON II (FB7094)

SARASON (FB6067)

This is one of our favorite Pedigrees. The Dam is a daughter of Kevinhanafuji. Kevinhanafuji is a result of a breeding between Kenhanafuji and Heatherkora. Kenhanafuji is a bull that was brought to America where he was immediately purchased by a Japanese businessman for \$150,000 and taken back to Japan. Heatherkora is a very rare daughter of Suzutani the most influential dam in the wagyu breed.

Free of all known genetic disorders.

HW0330 is from my private reserve dams. This will be the first embryos released from her. She is the Daughter of Kevinhanafuji who was sired by Kenhanafuji, a bull that reportedly sold for \$150,000. Kevinhanafuji was mated with Heatherkora the lost daughter of Suzutani. Suzutani is considered the most influential dam in the wagyu breed. To top it off lets throw in the bottom of the pedigree TF Kikuhana over a JVP Kikuyasu 400 daughter. Embryos can be exportable upon request with additional fee of \$50 per embryo.

Free of all Known genetic disorders.

Lot 24 FEEDER

Hanen 20 head solar powered automatic feeder.

This is a brand new never used Hanen 20 cow solar powered automatic feeder. I purchased six of these to get dealer pricing. New, these units sale for over \$10,000. These units have 20 individual slots. Timers in the feeder allow you to feed up to six times per day. You set the amount of feed and the timing of dispersal. These are great units for feeding calves or for feeding cows numerous times a day when you don't have the ability to do so with your existing feeding routine. Units are located at the ranch in Mineola. This unit is still in factory packaging and has not been used.
